## COMMERCIAL FEEDING STUFFS, 1917-1918

---

F. D. FULLER, M. S., CHIEF, DIVISION OF FEED CONTROL SERVICE

---

The Texas Feed Control bill was prepared at the request of representatives of the Texas Cottonseed Crushers' Association, the Cattle Raisers' Association of Texas and the Texas Grain Dealers' Association, and its enactment into law by the Legislature in 1905 was largely due to their efforts.

The demand for such a law was the result of the knowledge many consumers possessed that in the State of Texas were sold many inferior and adulterated feeds; articles from which they had no protection. The only relief was found in the enactment of a feeding stuffs law, a copy of which is as follows:

### COPY OF LAW REGULATING THE MANUFACTURE AND SALE OF FEEDING STUFFS IN TEXAS

#### Chapter 4, Title 12, Revised Criminal Statutes

ARTICLE 730. *Printed on Tag, Certificate of Name, Number of Pounds and Analysis; Penalty for Failure.*—Every lot or parcel of concentrated feeding stuffs, as defined in Article 732, used for feeding farm live stock, sold, offered or exposed for sale in the State of Texas, for use within this State, shall have printed on a tag, described in Article 734, a plainly printed statement clearly and truly certifying the number of net pounds of feeding stuff in the package, stating the name or names of material of which such weight is composed, where the contents are of a mixed nature, the name, brand or trade mark under which the article is sold, the name and address of the manufacturer, or importer, the place of manufacture, such information as is required by Article 740, if any, and a chemical analysis stating the minimum percentages it contains of crude protein, allowing one per cent of nitrogen to equal six and one-quarter per cent of protein, of crude fat, of nitrogen-free extract, and the maximum percentage it contains of crude fiber; these constituents to be determined by the methods adopted at the time by the association of official agricultural chemists of the United States. Mill products, hereinafter mentioned, shall have the following standard weight, viz.: Flour, one hundred and ninety-six pounds per barrel, or forty-eight pounds per sack; corn meal, bolted or unbolted, thirty-five pounds per sack; rice bran, one hundred and forty-three pounds per sack; rice polish, two hundred pounds per sack; and other feeds made from cereals of any kind, whether pure, mixed or adulterated, one hundred pounds per sack. Fractional barrels and sacks shall weigh in the same proportion, and those weights shall be net and exclusive of the barrel or sack in which said product is packed. And any person, firm or association of persons, engaged in the manufacture of mill products of any character whatsoever, who shall use any bag, box, barrel or any other receptacle, into which to put such product other than the one bearing the name of such mill manufacturing the same, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined in any sum from one hundred dollars to one thousand dollars, or, in addition thereto, be confined in the county jail for a term of thirty days, or both such fine and imprisonment. (Acts 1907, p. 243.)

ART. 731. *"Concentrated Commercial Feeding Stuff" Defined.*—The term "concentrated commercial feeding stuffs," as herein used, shall not include hay or straw, the whole seed or grains of wheat, rye, barley, oats, Indian corn, rice, buckwheat or broom corn, or any other whole or unground grains or seeds. (Act 1905, p. 207.)

ART. 732. "*Concentrated Feed Stuff*" Defined.—The term "concentrated feed stuffs," as herein used, shall include wheat bran, wheat shorts, linseed meals, cotton seed meals, pea meals, cocoanut meals, gluten meals, gluten feeds, maize feeds, starch feeds, sugar feeds, dried brewer's grains, malt sprouts, hominy feeds, cerealine feeds, rice meals, rice bran, rice polish, rice hulls, oat feeds, corn and oat chops, corn chops, ground beef or mixed fish feeds, and all other materials of similar nature not included in this article. (Ib., p. 207.)

ART. 733. *Manufacturer or Party Selling to File What, and Deposit Samples*.—Before any concentrated feeding stuff, as defined in Article 732, is so offered or exposed for sale, the importer, manufacturer and party who causes it to be sold, or offered for sale, within the State of Texas, for use within this State, shall, for each and every feed stuff, bearing a distinguishing name and trade mark, file with the director of the Texas Agricultural Experiment Station a certified copy of the statement named in Article 730, and shall also deposit with said director a sealed glass jar or bottle containing not less than one pound of the feeding stuff to be sold or offered for sale, accompanied by an affidavit that it is a fair average sample thereof, and corresponds within reasonable limits to the feeding stuff which it represents in the percentage of protein, fat and crude fiber, and nitrogen-free extract which it contains. This shall not be construed to apply to farmers who grind their own feed stuff, and who do not adulterate same. (Act 1907, p. 244.)

ART. 734. *To Pay Inspection Tax and Affix Tag*.—The manufacturer, importer, agent or seller of each concentrated commercial feeding stuff, as defined in Article 731, shall, before the article is offered for sale, pay to the director of the Texas Agricultural Experiment Station an inspection tax of ten cents per ton for each ton of such concentrated feeding stuff sold or offered for sale in the State of Texas, for use within this State, and shall affix to each lot shipped in bulk, and to each bag, barrel or other package of such concentrated feeding stuffs a tag to be furnished by said director, stating that all charges specified in said section have been paid. The director of said Texas Agricultural Experiment Station is hereby empowered to prescribe the form of such tags, and adopt such regulations as may be necessary for the enforcement of this law. Whenever the manufacturer or importer or shipper of a concentrated feeding stuff shall have filed a statement made in Article 730, and have paid the inspection tax, no agent or seller of said manufacturer, inspector, [importer] or shipper shall be required to file such statement or pay such tax. The amount of the inspection tax and penalties received by said director shall be paid into the State Treasury. So much of the inspection tax and penalties collected under this act shall be paid by the State Treasurer to the Treasurer of the Texas Agricultural and Mechanical College as the director of the Texas Agricultural Experiment Station may show by his bills has been expended in performing the duties required by this act, but, in no case, to exceed the amount of the inspection tax and penalties received by the State Treasurer under this act. Provided, the excess, if any, for the next two years may be used as it accrues by the Board of Directors of the Agricultural and Mechanical College for the purpose of putting up a station administration building, to provide the necessary offices and laboratory space, in order that the purposes of this act may be carried out. (Ib., p. 244.)

ART. 735. (As amended by Chapter 106, General Laws, 35th Legislature, p. 296.) *Penalty for Failure to Affix Tag or Label*.—Any manufacturer, importer, or agent, selling, offering or exposing for sale, any concentrated commercial feeding stuff, as defined in Article 731, without the statement required by Article 730, and the tax tag required by Article 734, or with a label stating that said feeding stuff contains a larger percentage of protein, fat, or nitrogen-free extract, or a smaller per cent of crude fiber than is contained therein, shall, on conviction, be fined not less than one hundred dollars, nor more than five hundred dollars for the first conviction, and not less than five hundred dollars nor more than one thousand dollars for each subsequent conviction.

ART. 736. *Penalty for Counterfeiting Tag.*—Any person who shall counterfeit, or use a counterfeit, of the tag or tags prescribed by this law, knowing the same to be counterfeited, or who shall use them a second time, after the said tags shall have been once attached, shall be guilty of a misdemeanor, and, on conviction thereof, shall be fined in a sum not exceeding five hundred dollars, one-half of which fine shall be paid to the informer; which fine may be doubled or tripled at each second or third conviction, and so on progressively for subsequent convictions. (Act 1905, p. 207.)

ART. 737. *Shall Furnish List of Names or Trade Marks.*—All manufacturers and importers of concentrated commercial feeding stuffs, or dealers in same, shall, when requested, furnish the director of the Texas Experiment Station with a complete list of names or trade marks of such feeding stuffs. (Ib., p. 207.)

ART. 738. *Analysis to Be Made and Published Annually.*—The director of the Texas Agricultural Experiment Station shall cause one analysis or more to be made annually of each concentrated commercial feeding stuff sold, or offered for sale, under the provisions of this act. Said director is hereby authorized in person, or by deputy, to take a sample not exceeding two pounds in weight for analysis from any lot or package of concentrated commercial feeding stuff which may be in the possession of any manufacturer, importer, agent, dealer or buyer in this State; but said sample shall be drawn or taken in the presence of said party or parties in interest or their representatives, and shall be taken from a parcel, lot or number of parcels, which shall not be less than five per cent of the whole lot inspected, and shall be thoroughly mixed and divided into two samples and placed in glass or metal vessels, carefully sealed, and a label placed on each, stating the name or brand of the feeding stuff or material sampled, the name of the party from whose stock the sample is drawn and the date and place of taking such sample; and said label shall be signed by the director or his deputy and the party or parties at interest, or their representative present at the taking and sealing of said sample; provided, that where the party or parties at interest refuse to be present and take part in the sampling of said feed stuffs, the director or his deputy may take said samples in the presence of two disinterested witnesses; one of said duplicate samples shall be retained by the director, and the other shall be left with the party whose stock was sampled; and the sample or samples retained by the director shall be for comparison with the certified statements made in Articles 730 and 733. The result of the analysis of the sample or samples so prescribed, together with such additional information as circumstances advise, shall be published in reports or bulletins by the Texas Agricultural and Mechanical College from time to time. (Ib., p. 207.)

ART. 739. *"Importer" Defined.*—The term, "importer," for all the purposes of this law, shall be taken to mean all such persons as shall bring into or offer for sale, within this State, concentrated commercial feeding stuffs manufactured without this State. (Ib., p. 207.)

ART. 740. *Manufacturing or Selling Adulterated Feeding Stuffs, Penalty for.*—Any person manufacturing, selling, or offering for sale any adulterated feeding stuff within this State, shall, upon conviction therefor, be punished by a fine of not less than twenty-five dollars and not more than two hundred dollars, or be imprisoned in the county jail for a term of not less than thirty days and not more than sixty days, or by both such fine and imprisonment. For the purpose of this act, a feeding stuff shall be deemed to be adulterated if it contains any sawdust, dirt, damaged feed, or any foreign matter whatever, or if it is in any respect not what it is represented to be; or if any rice hulls or chaff, peanut shells, corn cobs, oat hulls, or other similar substances of little or no feeding value are mixed therewith; provided, that no wholesome mixture of feeding stuffs shall be deemed to be adulterated if the true percentage of constituents thereof is plainly and clearly stated on the package, and made known

to the purchaser at the time of the sale. It shall be the duty of the director of the experiment station to examine, or have examined, for adulteration, all suspicious samples of feeding stuffs, and such other samples as may be desirable. (Act 1907, p. 245.)

### Title 92, Revised Civil Statutes, 1911

ART. 5903. *Empowering the Director of the Texas Agricultural Experiment Station to Adopt Standards.*—The director of the experiment station is hereby empowered to adopt standards or definitions for concentrated feeding stuffs and such regulations as may be necessary for the enforcement of the law. The said director shall have the power to refuse the registration of any feeding stuff under a name which would be misleading as to the materials of which it is made up, or which does not conform to the standards and definitions aforesaid. Should any of said materials be registered and it is afterwards discovered that they are in violation of the above provisions, the said director shall have the power to cancel the registration ten days after notice. The director of the Texas Experiment Station is hereby empowered to adopt such regulations as may be necessary for the enforcement of all the provisions of this act. (Acts 1907, p. 243, Section 11a.)

### OBJECTS OF THE LAW

1. To protect the purchasers of feed against adulterated and inferior articles.
2. To protect the honest manufacturer of and dealer in feeds against those who are unscrupulous.
3. To furnish purchasers with information which will enable them to distinguish between high-grade and inferior feeds; between reliable and unreliable manufacturers and dealers and to promote the intelligent and economical purchase and use of feeding stuffs.

These objects are attained through the following provisions and regulations:

1. By requiring all persons desiring to offer feeding stuffs for sale to submit a sworn statement of the minimum percentage each of crude protein, crude fat, and nitrogen-free extract, the maximum percentage of crude fiber and the name of each ingredient each brand of feed will contain and also to submit at least one pound of the feed to be registered.
2. By requiring that the guaranteed analysis must be printed upon the official tag which must be attached to each package of feed sold, offered or exposed for sale in the State. This guarantee must correspond exactly with that shown on the registration form.
3. By requiring that the guarantee be stated in simple terms which are readily understood by the consuming public.
4. By requiring the percentages of all ingredients of feeds in which adulterants are present. These percentages must appear upon the registration form and official tag.
5. By requiring that the names for feeds and ingredients present shall not mislead as to the materials used in their manufacture.
6. By providing for the securing of inspection samples of any feed sold, offered or exposed for sale in the State by official inspectors of the Feed Control Service and the subsequent analysis of same for comparison with guarantee.
7. By providing for detailed report of each inspection to the manufacturer, agent, dealer or consumer from whom sample is secured showing guaranteed and actual analysis, with remarks pertinent to the inspection.
8. By giving the manufacturer, firm or person responsible for the registration advance report and opportunity to review the results on all samples found deficient or adulterated.
9. By providing for the annual publication and free distribution (to citizens of the State) of a bulletin giving the results of inspection.
10. By limiting the analysis of samples to those secured by our official inspectors or according to official instructions, thus insuring that the samples are representative of the shipments.

11. By providing that the Director of the Texas Agricultural Experiment Station may adopt standards and definitions for feeding stuffs and prescribe such rules and regulations as he may deem necessary to carry into effect the full intent and meaning of the law, thus providing for the meeting of new conditions which may arise in the trade.

12. By providing for cooperation with the United States Department of Agriculture, whereby manufacturers and shippers of deficient or adulterated feeds from other states may be prosecuted directly under the provisions of the Federal Food and Drugs Act of 1906.

13. By providing penalties for violation of the law's provisions.

## HOW TO COMPLY WITH THE LAW

Manufacturers, importers, agents, dealers and consumers should give careful attention to the following:

### Manufacturers and Importers

**Registration.**—Any manufacturer, importer, agent or person desiring to sell, offer, or expose for sale within this State any commercial feeding stuff must register the brand with this office and submit a representative sample for deposit. The sample, of not less than one pound in weight, should be shipped by express, charges prepaid, in a glass jar or bottle properly sealed. The package must bear the name and address of the sender, who should also write to this Division when the sample is forwarded. Upon receipt of this sample, registration form will be furnished. The person desiring to register the feed for legal sale in the State is then required to complete the registration by furnishing the following information as required by law:

1. Brand name of feeding stuff.
2. Name and address of manufacturer or importer and place of manufacture.
3. Guaranteed analysis, stating the minimum percentages of crude protein, crude fat and nitrogen-free extract, and maximum percentage of crude fiber in the feeding stuff.
4. Names of the ingredients of which the feed is composed, in the case of a mixed feed.
5. Percentage of each ingredient of feeds in which corn cobs, rice hulls, or other similar adulterant is present.

When the registration form is properly filled out it should be acknowledged before a Notary Public and sent to this division, together with the tag order and remittance covering the same. In ordering tags, send money order, certified check or bank exchange. Under the provisions of the law, *personal checks cannot be accepted unless they are certified*. In case it is not convenient to remit as suggested above, tags may be sent C. O. D.

If, upon analysis of the deposit sample or official samples secured in the open market, it is found that the feed is not being manufactured in accordance with the registration, future tag orders will not be filled and after ten days' notice the registration will be canceled.

**Tags.**—After a feeding stuff is registered, the party so registering the same is notified that he may sell, offer or expose it for sale, provided he attaches the official tax tag to each bag, barrel, or other package, as required by law. Tags are issued by the Division of Feed Control Service at such a price as will make the inspection tax ten cents per ton on all concentrated commercial feeding stuffs sold or offered for sale within the State of Texas.

The following information is required to be printed on the reverse side of the tax tags, by the manufacturer, importer, agent, dealer or person registering the feeding stuff for legal sale:

1. Number of NET pounds of feeding stuffs the package contains.
2. Name of brand, exactly as shown in registration.
3. Names of the ingredients of which such feed is composed, in cases where the contents are of a mixed nature.
4. Percentage of each ingredient of the feed in which corn cobs, rice hulls,

peanut shells, oat hulls, or other similar substances of little or no feeding value, are present.

5. Name and address of manufacturer or importer and place of manufacture.

6. Guaranteed analysis consisting of the minimum percentages of crude protein, crude fat and nitrogen-free extract, and maximum percentage of crude fiber, in the feeding stuff, exactly as shown in the registration.

Attention is called to the fact that the information appearing upon the registration form and outlined above must be plainly PRINTED upon the reverse side of the tag, but this work must be done by commercial printers. *The use of rubber stamp for this purpose cannot be permitted.*

#### PRICE LIST OF TAGS

5 pound tags.....	\$ .25	per M
6½ pound tags.....	.31½	per M
8½ pound tags.....	.41½	per M
10 pound tags.....	.50	per M
12½ pound tags.....	.62½	per M
16½ pound tags.....	.83½	per M
25 pound tags.....	1.25	per M
50 pound tags.....	2.50	per M
75 pound tags.....	3.75	per M
100 pound tags.....	5.00	per M
125 pound tags.....	6.25	per M
143 pound tags.....	7.15	per M
150 pound tags.....	7.50	per M
167 pound tags.....	8.35	per M
175 pound tags.....	8.75	per M
200 pound tags.....	10.00	per M

*The blank tax tag is furnished by this Division and is the only label which can legally be used in the sale of feeding stuffs in Texas.* This tag contains the statement, on the reverse side, that the inspection fee has been paid and, when properly printed, on the reverse side, by the manufacturer, contains all the information required by law.

**Private Tags.**—*Private tags are confusing and should not be attached to packages, neither should there appear any statements on containers or in advertising matter which conflict in any manner with those upon the Texas tax tag.*

Whenever a shipment of feeding stuff is found in the open market of the State bearing statements on containers or on private tags attached to the packages, which conflict with the information appearing on the official tax tags, it will be considered misbranded and such action will be taken as is considered advisable.

**Guarantees.**—Care should be taken to insure that guarantees submitted on the registration form are correct and based upon results obtained by the methods of the Association of Official Agricultural Chemists. Remember that the guarantees for crude protein, crude fat and nitrogen-free extract are a minimum and those for crude fiber are a maximum, and always establish those which can be maintained.

**Samples.**—*Deposit samples must accompany registration certificates.* The only samples analyzed are those obtained by the regular feed inspectors and those secured in accordance with official instructions from this office. Do not forward other samples for analysis. This Division can not analyze samples for registration purposes but it will suggest tentative guarantees for the use of manufacturers, on request, with the understanding that if they are accepted this Division will not be responsible in case the analyses of inspection samples show that the guarantees are incorrect. Deposit samples, however, are frequently analyzed for information to assist in the administration of the law.

**Change in Guarantee.**—Annual registration is *not* required. When it is desired to change the guarantee for a registered brand it is necessary to submit a "Registration Adjustment Clause" blank properly filled out and acknowledged before a Notary Public. These blanks are furnished by this Division. The Division reserves the right to refuse reregistration without change in brand name when the contemplated change in manufacture will result in a feed of inferior grade. Whenever the brand name is changed, authority should be given to cancel former registration.

**Package Sales.**—*Attach a Texas tax tag to each and every package*, bearing in mind that tags are issued in certain denominations (see page 8) and that the *net* weight printed upon the tag must correspond with that of the package.

**Bulk Sales.**—Manufacturers or importers shipping feeding stuffs in bulk, must furnish the purchaser with tags to cover, at the regular tonnage rate of twenty tags of one hundred pounds each. For instance, if the manufacturer or importer sells to John Doe and Sons, ranchmen, a carload of loose cottonseed cake, it will be the duty of the manufacturer or importer to transmit to the purchasers a sufficient number of tags to cover the shipment. In the event that John Doe and Sons fail to receive these tags simultaneously with the shipment it will be their duty immediately to notify the Division of Feed Control Service. A complete record of such sales, with number of tags furnished, should be kept by manufacturers, agents and importers for the information of this Division.

Manufacturers are advised not to make shipments of untagged feeds expecting to register and furnish tags later. Registration must be made before shipment, and official tags must be attached to packages at time of delivery.

**Alteration of Official Tag.**—Tags must be printed in conformity with the registration on file in this office. Any change as regards name of manufacturer, brand name, guaranteed analysis, names of ingredients used, etc., is a misdemeanor and places anyone using such altered tags in position to be prosecuted for violating the law.

**Feeds Requiring Registration.**—The term "concentrated commercial feeding stuff" is defined to include *all materials* offered or exposed for sale, distributed or sold for *feeding purposes except* hay or straw, the whole seed or grains of wheat, rye, barley, oats, Indian corn, rice, buckwheat or broom corn, or any other whole or unground grains or seeds.

Rulings and regulations of the Division of Feed Control Service in so far as they relate to persons or firms desiring to offer feeding stuffs for sale in Texas and blank forms for making the necessary registration will be furnished on request.

#### Agents, Dealers and Distributors

**The Texas Feed Law.**—Before offering or exposing for sale, selling or distributing feed in Texas, read carefully the complete copy of the law as printed in this bulletin, and thoroughly acquaint yourself with its requirements.

**Companies.**—Do not accept the agency for any company unless you are satisfied that their record from year to year shows compliance with the feed law. By consulting the annual reports of this Division, you can readily ascertain what companies have a disposition to comply with the law and are successful in maintaining their guarantees.

*Note Carefully.*—*The person offering or exposing for sale, selling or distributing feed in Texas is directly responsible for feed meeting the requirements of the law, and repeated purchases from companies with a poor record of inspection will leave this Division no option but to file information with the county attorney.*

**Withdrawal from Sale.**—Each package of feed coming within the provisions of the law must be properly tagged before it is sold, offered or exposed for

sale in the State. In the event that the inspector finds the law violated in this respect, he will advise withdrawal from sale until properly printed official tags are available and one attached to each package of 100 pounds or fraction thereof. It is to be understood, however, that *compliance with this request will in no wise restrict this Division in taking such action in the courts as may be deemed advisable.*

**Official Tags.**—A reproduction of the official tag, which is issued by this Division and is the only tag that can legally be used in the sale of feeds in Texas, will be found on page 12.

*Do not accept, offer or expose for sale, sell, deliver or distribute any package of feed which does not have an official tag attached for each 100 pounds or fraction. If dealers accept untagged shipments they must assume the responsibility and bear the penalty for selling feed in violation of the law.*

**Shipments Without Official Tags Attached.**—There is no good reason for shipments going forward without official tags attached, but when such shipments are apparently necessary, tags are usually sent separately by mail or express. In such cases, privilege of examination should be required before payment is made. *No reputable manufacturer or broker will object to reasonable examination before sight draft is paid. In cases of untagged shipments made by parties who refuse permission for examination, refuse the shipment and notify this Division by telephone or telegraph.*

**Terms and Conditions.**—In contracting for feeds, make purchases only on basis of official tag and not on private labels or advertising matter.

1. Determine that the feed quoted is properly registered for legal sale in Texas.

2. Examine the reports of this Division to ascertain if the guarantee of this particular brand has been maintained by the manufacturer or importer in the past.

3. Contract on the basis of the official guarantee.

4. Always examine official tags attached to packages or furnished with bulk shipments on arrival and if they are at variance with the contract do not accept the shipment until the matter has been satisfactorily adjusted.

*It is also advisable to notify this Division promptly of all facts in the case. Please bear in mind that the Division of Feed Control Service is always ready to be of assistance to you in so far as it is consistent with its official duties.*

**Weights of Packages.**—In addition to taking samples, the inspectors are required to weigh packages of feed frequently to prevent the practice of giving short weights which has been prevalent in some states. If short weight shipments are suspected, weigh not less than twenty packages selected at random and if an average shortage of one pound or more per 100 pounds is found, refuse to accept the shipment and notify this Division by telephone or telegraph so that an inspector can be sent to make an official inspection. The scale used should be previously tested and found accurate. *The law requires that the number of net pounds must be printed upon the official tag attached to each package of feed and this amount must be delivered to the consumer.* Special attention will be given to this provision of the law in order to detect and prosecute violators.

**Inspections.**—In case an inspection is desired, do not take a sample from the shipment at random and forward to this Division but write to us, stating the amount of feed on hand, brand name, name and address of manufacturer, and special reasons for desiring the inspection. In case the amount present is sufficient to justify the expense, an inspector will be sent to secure an official sample for analysis.

**Reports of Inspections.**—A report of the inspection of every sample secured from feed in your possession will be mailed to you and if it shows that the feed sampled is deficient in feeding value or adulterated to such an extent that you are advised to withdraw from sale the balance of the shipment, do so promptly and report to us the amount so withdrawn and the date. After you

are advised that a shipment does not meet the requirements of the Texas feed law there can be no good excuse for continuing its sale, and in all such cases prompt complaint will be filed with the county attorney by this Division.

**Rebates.**—The Texas Feed Law makes no provision for the payment of rebates to cover deficiencies and, although this practice often shows the good intentions of the manufacturer, the payment of such rebates will have no bearing on any action which may be taken in cases of violation of the law. Where rebates are paid, it is required that agents, dealers, or distributors prorate these rebates to the purchasers so that the consumers may receive their benefit. Always secure and file with this Division receipts from each purchaser showing the amount of feed bought, rebate received and date.

*The payment of rebates never fully remunerates the consumer for being furnished feed which is deficient in valuable nutrients.*

**Additional information will be gladly furnished on request.**

### Consumers

**Official Tags.**—Do not accept any feeding stuff unless Texas tax tags are furnished and purchase only those brands which are manufactured by companies whose record of inspection shows that their guarantees are maintained.

**Examine Official Tag.**—In purchasing feeding stuffs always carefully examine the official tags attached and purchase on the official guarantee and actual analysis as indicated in the reports of this Division and not on statements of salesmen or in advertising matter. Always bear in mind that the value of a feed depends not only upon the ingredients of which it is composed but also upon the amount of *digestible* nutrients present.

**Clubs, Associations, Etc.**—All feeding stuff accepted, delivered or distributed must be accompanied by Texas tax tags. The person or persons to whom the shipments of feeding stuff are consigned will be held responsible for such shipments meeting all the requirements of the law.

**Special Requests for Inspection.**—If an inspection is desired, write to the Division of Feed Control Service, stating the amount of feed on hand, brand name, name and address of manufacturer, and special reason for desiring the services of an inspector. In case the amount present is sufficient to justify the expense, an inspector will be sent to secure an official sample, make a thorough investigation and report to the office.

**Freight Bills, Invoices, Etc.**—It is important that *purchasers of feed in car lots* should always have available for the use of the inspector the following information: the total number of tons in the shipment; number and initials of car in which shipment is received; number and date of waybill; name of railroad issuing waybill; name of town from which shipment was made; name of firm from whom feed was purchased; date of original waybill; date shipment was received and price per ton. This information is especially valuable to the Division in all cases involving the shipment of feed from other States.

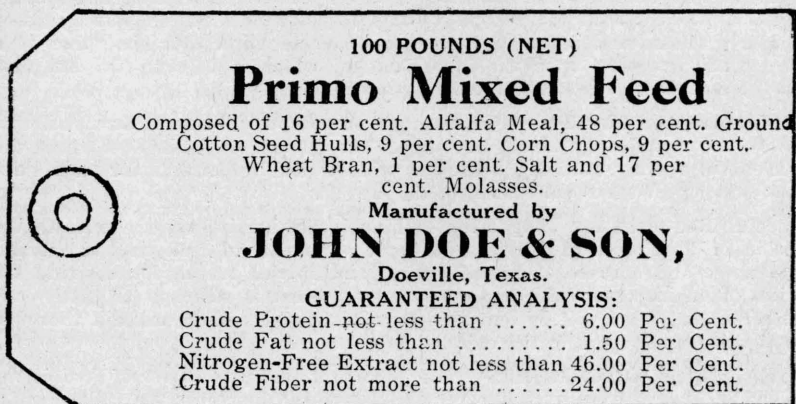

**WATCH FOR TEXAS TAX TAG—FOR YOUR PROTECTION ACCEPT NO OTHER**

The official Texas tag, a reproduction of which follows, is always printed, contains all the information required by law and the facsimile signatures of the Director, Texas Agricultural Experiment Station and the Chief, Division of Feed Control Service.

Obverse side—printed by this Division.

Reverse side—printed by manufacturer or importer.

#### ADMINISTRATION OF THE LAW

The Texas Feed Law is administered by the Director of the Texas Agricultural Experiment Station, College Station, Texas, who has been given legal authority to act as the executive officer, although the details in connection with its administration are entrusted to the Division of Feed Control Service of the Experiment Station, to which should be addressed all communications relating to the sale of feeding stuffs in Texas.

**Official Samples.**—Official samples of feeding stuffs are drawn in the open market of the State by regularly appointed inspectors who are especially trained for this work. The inspectors are on the road each working day, collecting samples of feeds which are sent to the office and subsequently analyzed by the chemist of the Feed Control Service. The results of the analyses of samples, together with such additional information as circumstances advise, are published in bulletin form each year for gratuitous distribution to residents of the State.

**Inspections.**—It is a physical impossibility to inspect each lot of feed distributed in Texas, but it is the aim of the Division to make two inspections each year of every brand offered for sale. Only by thorough inspection can the feed law be administered properly, and this necessitates a visit by an inspector to each town of importance in the State at least once in two months. In cases where manufacturers of brands have poor inspection records, samples are secured wherever shipments are found.

**Reports.**—The results of the inspection of samples are reported both to the manufacturer and to the person from whom samples are obtained. In the case of appreciably deficient or of adulterated samples the manufacturer is given ten (10) days advance notice in which to file objections. A portion of the official sample is furnished if requested. As soon as the adulteration or deficiency is detected the agent offering the feed for sale is notified that it is misbranded and is advised to remove it from sale, pending adjustment of such cases. Failure to accept this advice will necessitate his being reported for wilful violation of the Texas feed law.

No report will be made on samples secured from untagged shipments but results obtained will be published in the annual bulletin.

**Manufacturers' Claims** will be given every consideration but samples will not to be referred for final settlement and only results which can be duplicated in the State Chemist's laboratory will be accepted as official.

**Cancellation of Registration.**—Should any feeding stuff be registered and it is afterwards discovered that it is sold in violation of the provisions of the feed law, the Director of the Texas Experiment Station has the power to cancel the registration ten days after notice, and the manufacturer or importer is no longer permitted to offer this product for sale until properly registered and tagged. Prosecution often follows.

#### DEFINITION OF TERMS

The Texas feed law requires a guarantee of minimum percentages of crude protein, crude fat and nitrogen-free extract, and a maximum percentage of crude fiber. The complete analysis of a feed includes its content of moisture, crude protein, crude fat, crude fiber, ash and nitrogen-free extract, expressed in percentages.

**Water** (moisture) is always contained in feeding stuffs, but since it is furnished for the most part in liquid form it cannot be considered as having any special nutritive value.

**Value of Water.**—The more water a feeding stuff contains the less of the other nutrients it contains, and the more liable it is to be injured by heating, mold, and so forth. The water content of feed varies, being larger in fresh grain.

**Protein**, being the constituent of food which forms flesh, muscle, hair, ligament and other portions of the animal body, is of great importance. It replaces the wear and tear of the animal tissue and furnishes material for additional flesh. Besides furnishing material for tissue, protein may be burned in the body to produce heat or it may serve as a source of fat in case of a deficiency in carbohydrates and fat accompanied by excess of protein. It is, however, a costly source of heat and fat.

**Value of Protein.**—Protein is the most expensive portion of a feeding stuff, and feeding stuffs rich in protein usually sell for a higher price than feeding stuffs low in protein, though the difference is not as great in Texas as it is in the Northern States. With a given feeding stuff, the more protein it contains the better its quality, compared with other feeding stuffs of the same class. For example, cottonseed meal containing 48 per cent. protein is of better quality than cottonseed meal containing 45 per cent. protein. A low protein content accom-

panied by a high content of crude fiber indicates that the cottonseed meal contains an excessive amount of hulls.

We cannot, however, compare the value of feeding stuffs of different kinds on a protein basis alone. For example, a cottonseed meal containing 45 per cent. of protein does not have five times the value of corn chops containing 9 per cent. protein. There are other constituents of both feeding stuffs (fat and nitrogen-free extract), which are of value to the animal, and corn chops contains much more nitrogen-free extract than cottonseed meal. The digestibility of the constituents is also of importance. This is discussed in special bulletins of the Experiment Station, which may be had upon application to the Director.

*Fat (or Ether Extract)* is composed mainly of fats and oils in the case of concentrated commercial feeding stuffs, but with fodders and hays it is often composed to a considerable extent of waxes, coloring matter, and other substances. Fat is used in the animal body as a source of body fat, and to furnish heat and energy. The animal requires heat to keep its body warm, and energy to run the animal mechanism, or to do the outside work. The beating of the heart, chewing, movements of the intestines, and the involuntary muscular movements require energy which is furnished by the oxidation of fats, carbohydrates or protein. One pound of fat is equal to 2.25 pounds of carbohydrates.

*Value of Fat.*—Fat ranks next to protein in value as a feeding constituent. The more protein and fat a given feeding stuff contains the better its quality compared with other feeding stuffs of the same class. Cottonseed meal containing 55 per cent. of protein and fat combined, is of higher value than cottonseed meal containing 49 per cent. of protein and fat combined. Cottonseed meal is indeed often sold on the basis of its protein and fat content, as determined by chemical analysis.

As with protein alone, however, two feeds of different kinds cannot be compared on the basis of their content of protein and fat, since other factors enter into consideration. These factors will be discussed later.

*Crude Fiber* is the proportion of the plant which resists the intense action of acids and alkalis. It consists mostly of the cell walls and woody fiber of the plant, and is the most indigestible part of the feeding stuff. By means of fermentation in the intestines, crude fiber is digested to some extent by animals which chew the cud. The operation, however, consumes so much energy that a large proportion of the value of the crude fiber is taken up by the process of digestion. Hays and fodders and other roughness generally contain much crude fiber, but concentrated feeding stuffs contain comparatively small quantities of it.

*Value of Crude Fiber.*—Crude fiber is the woody and less digestible portion of a feeding stuff. The more crude fiber a feeding stuff contains the poorer its quality compared with other feeding stuffs of the same class. Feeding materials of low commercial value and of low value to the animal, such as straw, cottonseed hulls, rice hulls, oat hulls, corn cobs, and so forth, contain large quantities of crude fiber, and their addition to a concentrated feeding stuff increases its content of crude fiber. Thus, if the crude fiber in cottonseed meal exceeds certain limits, it indicates that the meal is adulterated with cottonseed hulls. In a similar way, crude fiber in excess of a given maximum indicates corn cobs or corn bran in corn chops; rice hulls in rice bran, and so on. The amount of crude fiber is a much more sensitive indication of the low quality or of adulteration than the protein and fat, since the adulterants generally contain large percentages of crude fiber.

To repeat, the more crude fiber a feeding stuff contains the poorer its quality compared with other feeding stuffs of the same class. This also holds good in comparing feeding stuffs of different kinds, but not entirely; we must also consider the protein and fat content of the two kinds of feeding stuffs. Thus, wheat bran contains considerably more crude fiber than corn chops, but has a higher value when protein is worth more than fat and nitrogen-free extract.

*Ash* is the residue left when the plant is burned. It represents mostly the mineral portion of the plant and the portion which comes from the soil, although a part of the ingredients withdrawn from the soil are volatilized during com-

bustion. Nitrogen particularly is driven out completely. Ash is valuable to the animal, inasmuch as it furnishes material for bone, and some constituents of it, particularly the phosphoric acid and sulphur, are essential constituents of the animal cell.

*Value of Ash.*—Ash is necessarily present in feeding stuffs. An excessive amount indicates contamination with dirt, sand, or other mineral matter. Too little ash in the ration may give rise to disorders, especially in young animals.

*Nitrogen-free Extract* is composed of starch, sugar, dextrin, and other substances of a similar nature. These substances are mostly carbohydrates; that is, they contain carbon, and hydrogen and oxygen in proportion to form water. Crude fiber is also composed largely of carbohydrates.

*Value of Nitrogen-free Extract.*—The nitrogen-free extract of most concentrated commercial feeding stuffs, such as corn chops, wheat bran, cottonseed meal, kafir, and so forth, is composed largely of sugars and starches which are readily digested and have considerable value to the animal.

The nitrogen-free extract of wheat skins, corn bran, corn cobs, rice hulls, hays and straws, and similar feeding stuffs, is composed mostly of other substances than sugar and starch, and has a lower value to animals. The nitrogen-free extract of these two kinds of feeding stuffs, therefore, cannot be compared directly.

In general, we may say that the more protein, fat and nitrogen-free extract, and the less crude fiber and ash, a given feed contains, compared with other feeding stuffs of the same kind, the better the quality.

The same statement also holds in comparing feeding stuffs of different kinds, but not altogether, since in comparing feeding stuffs of different kinds we must also consider the digestibility and the productive value of the digested materials.

*Carbohydrates* is a collective term applied to crude fiber and nitrogen-free extract.

## STANDARDS AND DEFINITIONS ADOPTED

The law empowers the Director of the Experiment Station to adopt names, standards and definitions for feeding stuffs. He may refuse the registration of any feeding stuff under a name which would be misleading as to the materials of which it is made, or which does not conform to the standards and definitions adopted. If a feeding stuff is registered and then discovered to be in violation of the standards and definitions adopted, the Director has the power to cancel registration after ten days' notice.

Feeding stuffs cannot be sold under names that are false or misleading. Should the manufacturer desire to use a name not included in the following list, it will be advisable for him to correspond with the Division of Feed Control Service before making application for registration.

In accepting certificates for the registration of feeding stuffs to be sold in Texas, many of the definitions adopted by the Association of Feed Control Officials are followed closely. In addition to the official definitions, the following include standards and definitions formulated by this Division from the most reliable data available. Definitions not from A. F. C. O. are marked with an asterisk (\*).

### Alfalfa Products

**Alfalfa Meal** is the entire alfalfa hay ground, and does not contain an admixture of ground alfalfa straw or other foreign material. Standard: It must contain not less than 12 per cent. of crude protein and 1 per cent. of crude fat, and not more than 30 per cent. of crude fiber.

**Chopped Alfalfa\*** is the entire alfalfa hay chopped, and not ground finely enough to be a meal. Standard: It must contain not less than 12 per cent. of crude protein and 1 per cent. of crude fat, and not more than 30 per cent. of crude fiber.

### Animal Products

**Blood meal** is ground dried blood.

**Cracklings** are the residue after partially extracting the fats and oils from

the animal tissue. If they bear a name descriptive of their kind, composition or origin, they must correspond thereto.

**Digester Tankage** is the residue from animal tissue, exclusive of hoof and horn, specially prepared for feeding purposes by tanking under live steam, drying under high heat, and suitable grinding. If it contains more than 10 per cent. of phosphoric acid ( $P_2O_5$ ) it must be designated **Digester Meat and Bone Tankage**.

**Meat Scrap and Meat Meal** are the ground residues from animal tissues exclusive of hoof and horn. If they contain more than 10 per cent. of phosphoric acid ( $P_2O_5$ ) they must be designated **Meat and Bone Scrap and Meat and Bone Meal**. If they bear a name descriptive of their kind, composition or origin, they must correspond thereto.

#### Brewers' and Distillers' Products

**Brewers' Dried Grains** are the properly dried residue from cereals obtained in the manufacture of beer.

**Distillers' Dried Grains** are the dried residue from cereals obtained in the manufacture of alcohol and distilled liquors. The product shall bear the designation indicating the cereal predominating.

**Malt Sprouts** are the sprouts of the barley grain. If the sprouts are derived from any other malted cereal, the source must be designated.

#### Buckwheat Products

**Buckwheat Shorts or Buckwheat Middlings** are that portion of the buckwheat grain immediately inside of the hull after separation from the flour.

#### Corn Products

**Corn Chops\*** consists of the pure grain of corn from sound seed and good quality, chopped. Standard: It must contain not less than 9 per cent. of crude protein and 3.5 per cent. of crude fat, and not more than 3 per cent. of crude fiber.

**Corn Bran** is the outer coating of the corn kernel. Standard: It must contain not less than 8 per cent. of crude protein and 5 per cent. of crude fat, and not more than 12 per cent. of crude fiber.

**Corn Germ Meal** is a product in the manufacture of starch, glucose and other corn products, and is the germ layer from which a part of the corn oil has been extracted.

**Corn Feed Meal\*** is the by-product obtained in the manufacture of cracked corn, or table meal from the whole grain of corn. Standard: It must contain not less than 8 per cent. of crude protein and 3 per cent. of crude fat, and not more than 3 per cent. of crude fiber.

**Corn Gluten Feed** is that portion of commercial shelled corn that remains after the separation of the larger part of the starch and the germ by the processes employed in the manufacture of cornstarch and glucose. It may or may not contain corn solubles.

**Corn Gluten Meal** is that part of commercial shelled corn that remains after the separation of the larger part of the starch, the germ and the bran, by the processes employed in the manufacture of cornstarch and glucose. It may or may not contain corn solubles.

**Ear Corn Chops\*** is husked corn and cob chopped with not a greater proportion of cob than occurs in the ear corn in its natural state. Standard: It must contain not less than 8 per cent. of crude protein and 3 per cent. of crude fat, and not more than 8 per cent. of crude fiber. The percentages of grain and cob must be shown on tax tag.

**Hominy Feed, Hominy Meal or Hominy Chop\*** is a mixture of the bran coating, the germ and a part of the starchy portion of the corn kernel obtained in the manufacture of hominy grits for human consumption. Standard: It must contain not less than 10 per cent. of crude protein and 6 per cent. of crude fat, and not more than 5 per cent. of crude fiber.

Grits are the hard, flinty portions of Indian corn, without hulls and germs.

#### Cottonseed Products\*

Cottonseed products are classified as follows:

1. Choice Cottonseed Meal.
2. Prime Cottonseed Meal.
3. Ordinary Cottonseed Meal.
4. Cottonseed Feed Number Four.
5. Cottonseed Feed Number Five.
6. Cottonseed Feed Number Six.
7. Choice Cold Pressed Cottonseed.
8. Prime Cold Pressed Cottonseed.

**Choice Cottonseed Meal** is composed of the decorticated kernels of cottonseed, free from excess of hulls and other foreign materials. It must be finely ground, of sweet odor and reasonably bright in color. Standard: It must contain not less than 48 per cent. of crude protein and 7 per cent. of crude fat, and not more than 9 per cent. of crude fiber.

**Prime Cottonseed Meal** is composed of the decorticated kernels of cottonseed, free from excess of hulls and other foreign materials. Standard: It must contain not less than 45 per cent. of crude protein and 6 per cent. of crude fat, and not more than 10 per cent. of crude fiber.

**Ordinary Cottonseed Meal** is composed of the decorticated kernels of cottonseed, free from excess of hulls and other foreign materials. Standard: It must contain not less than 43 per cent. of crude protein and 6 per cent. of crude fat, and not more than 12 per cent. of crude fiber.

**Cottonseed Cake** shall correspond to cottonseed meal in composition and as to standard and classification.

**Cottonseed Feed Number Four** is composed of the decorticated kernels of cottonseed, reasonably free from excess of hulls and other foreign materials. Standard: It must contain not less than 41.20 per cent. of crude protein and 5 per cent. of crude fat, not more than 14 per cent. of crude fiber, and not more than 10 per cent. of excess cottonseed hulls.

**Cottonseed Feed Number Five** is composed of the decorticated kernels of cottonseed, reasonably free from excess of hulls and other foreign materials. Standard: It must contain not less than 38.50 per cent. of crude protein and 5 per cent. of crude fat, not more than 18 per cent. of crude fiber, and not more than 16 per cent. of excess cottonseed hulls.

**Cottonseed Feed Number Six** is composed of the decorticated kernels of cottonseed, reasonably free from excess of hulls and other foreign materials. Standard: It must contain not less than 36 per cent. of crude protein and 5 per cent. of crude fat, not more than 22 per cent. of crude fiber, and not more than 22 per cent. of excess cottonseed hulls.

The composition, standard and classification of cottonseed feed shall be the same whether ground or cracked.

**NOTE.**—In establishing the standards for cottonseed feed, the percentages of excess cottonseed hulls permissible are based upon the assumption that cottonseed meal carrying 43 per cent. of crude protein contains no more cottonseed hulls than are incidental to the process of manufacturing this grade of meal.

The percentage of cottonseed hulls contained in cottonseed feed is required to be shown on tags in order that this product may not be deemed to be adulterated.

NOTE.—Any deficiency in the percentage of fat may be offset by additional percentage of protein, as, for instance, in cottonseed meal guaranteed to contain 5 per cent. of fat, 46 per cent. of protein would be required in order that the combined amount of protein and fat be 51 per cent.

**Choice Cold Pressed Cottonseed** is the product resulting from subjecting the whole, sound, mature, clean undecorticated cottonseed to the cold pressure process for the extraction of oil and includes the entire cottonseed less the lint, and the oil extracted. Standard: It must contain not less than 28 per cent. of protein.

**Prime Cold Pressed Cottonseed** is the product resulting from subjecting the whole, sound, mature, clean, undecorticated cottonseed to the cold pressure process for the extraction of oil and includes the entire cottonseed less the lint, and the oil extracted. Standard: It must contain not less than 25 per cent. of protein.

**Ground Cold Pressed Cottonseed** is cold pressed cottonseed, ground. It must correspond to cold pressed cottonseed in composition and as to standards.

**Cottonseed Meal and Hulls** is a mixture of cottonseed meal and cottonseed hulls containing not less than 25 per cent. or more than 35 per cent. of protein. The percentage of meal and hulls must be shown on the tag.

**Cottonseed Cake and Hulls** shall correspond to cottonseed meal and hulls in composition and as to standard.

#### Feterita Products\*

**Feterita Chops** consists of the entire grain removed from the head and chopped. Standard: It must contain not less than 11 per cent. of protein, 2.75 per cent. of fat, and not more than 3 per cent. of crude fiber.

**Feterita Head Chops** consists of the entire head, chopped. Standard: It must contain not less than 10 per cent. of protein, 2.50 per cent. of fat, and not more than 8 per cent. of crude fiber.

#### Kafir Products\*

**Kafir Chops** consists of the entire grain removed from the head and chopped. Standard: It must contain not less than 9 per cent. of protein, 2.50 per cent. of fat, and not more than 3.50 per cent. of crude fiber.

**Kafir Head Chops** consists of the entire head, chopped. Standard: It must contain not less than 8 per cent. of protein, 2.50 per cent. of fat, and not more than 8 per cent. of crude fiber.

**Kafir Head Stems** consists of the head of kafir from which the grain has been removed.

#### Linseed and Flax Products

**Flax Plant By-Product** is that portion of the flax plant remaining after the separation of the seed, the bast fiber and a portion of the shives, and consists of flax shives, flax pods, broken and immature flax seeds, and the cortical tissue of the stem.

**Unscreened Flaxseed Oil Feed** is the ground product obtained after extraction of part of the oil from unscreened flaxseed by crushing, cooking and hydraulic pressure, or by crushing, heating and the use of solvents. When sold without grinding the unground product shall be designated as "unscreened flaxseed oil cake." Ingredients of unscreened flaxseed oil feed are ground cake from partially extracted flaxseed and foreign seeds (wheat, wild buckwheat, pigeon grass, wild mustard, etc.)

**Screenings Oil Feed** is the ground product obtained after extraction of part of the oil by crushing, cooking and hydraulic pressure, or by crushing, heating and the use of solvents, from smaller imperfect grains, weed seeds and other

foreign materials having feeding value separated in cleaning the grain. The name of the grain from which the screenings are separated shall be prefixed to "screenings oil feed."

#### **Milo Products\***

**Milo Chops** consists of the entire grain removed from the head and chopped. Standard: It must contain not less than 9 per cent. of protein, 2.50 per cent. of fat, and not more than 3.50 per cent. of crude fiber.

**Milo Head Chops** consists of the entire head, chopped. Standard: It must contain not less than 8 per cent. of protein, 2.50 per cent. of fat, and not more than 8 per cent. of crude fiber.

**Milo Head Stems** consists of the head of the milo from which the grain has been removed.

#### **Oat Products**

**Oat Groats** are the kernels of the oat berry.

**Oat Hulls** are the outer chaffy coverings of the oat grain.

**Oat Middlings** are the floury portions of the oat groat obtained in the milling of rolled oats.

**Oat Shorts** are the covering of the oat grain lying immediately inside the hull, being a fuzzy material carrying with it considerable portions of the fine floury part of the groat obtained in the milling of rolled oats.

**Clipped Oat By-Product** is the resultant by-product obtained in the manufacture of clipped oats. It may contain light chaffy material broken from the ends of the hulls, empty hulls, light, immature oats and dust. It must not contain an excessive amount of oat hulls.

#### **Peanut Products\***

**Choice Peanut Meal** is the product from the kernels of sound peanuts, free from excess of hulls and other foreign materials. Standard: It must be finely ground, of sweet odor, and must contain not less than 48 per cent. of protein, not less than 7 per cent. of fat, and not more than 9 per cent. of crude fiber.

**Prime Peanut Meal** is the product from the kernels of sound peanuts, free from excess of hulls and other foreign materials. Standard: It must be of sweet odor, and contain not less than 45 per cent. of protein, not less than 6 per cent. of fat and not more than 14 per cent. of crude fiber.

**Ordinary Peanut Meal** is the product from the kernels of sound peanuts, reasonably free from excess of hulls and other foreign materials. Standard: It must be of sweet odor, and contain not less than 43 per cent. of protein, not less than 6 per cent. of fat and not more than 17 per cent. of crude fiber.

**Peanut Cake** shall correspond to peanut meal in composition and as to standards.

**Choice Whole Pressed Peanuts** is the product resulting from subjecting the whole, sound, mature, clean peanut free from sticks, stems and dirt to pressure for the extraction of oil, and includes the entire peanut less the oil extracted. Standard: It must contain not less than 36 per cent. of protein and not more than 22 per cent. of crude fiber.

**Prime Whole Pressed Peanuts** is the product resulting from subjecting the whole, sound, mature, clean peanuts reasonably free from sticks and stems to pressure for the extraction of oil, and includes the entire peanut less the oil extracted. Standard: It must contain not less than 34 per cent. of protein and not more than 24 per cent. of crude fiber.

**Ground Whole Pressed Peanuts** shall correspond to whole pressed peanuts in composition and as to standards.

### Rice Products

**Rice Bran\*** is the cuticle of the rice grain, with only such quantity of hulls as is unavoidable in the regular milling of rice. Standard: It must contain not less than 11 per cent. of crude protein and 10 per cent. of crude fat, and not more than 15 per cent. of crude fiber.

**Rice Polish** is the finely powdered material obtained in polishing the kernel. Standard: It must contain not less than 11 per cent. of crude protein and 6 per cent. of crude fat, and not more than 4 per cent. of crude fiber.

**Rice Hulls** are the outer chaffy coverings of the rice grain.

### Sorghum Products\*

**Sorghum Chops** consists of the entire grain removed from the head and chopped. Standard: It must contain not less than 9 per cent. of crude protein and 2.5 per cent. of crude fat, and not more than 3 per cent. of crude fiber.

**Sorghum Head Chops** consists of the entire head, chopped. Standard: It must contain not less than 8 per cent. of crude protein and 2.5 per cent. of crude fat, and not more than 8 per cent. of crude fiber.

**Sorghum Head Stems** consists of the head of sorghum from which the grain has been removed.

### Sugar Beet Product\*

**Dried Sugar Beet Pulp** is the dried residue obtained in the manufacture of beet sugar, after extraction of the larger percentage of the sugar from the beet.

### Wheat Products\*

**Wheat Bran** is the coarse outer coating of the wheat kernel as separated from cleaned and scoured wheat in the usual process of commercial milling. Standard: It must contain not less than 14.50 per cent. of crude protein and 3 per cent. of crude fat, and not more than 10 per cent. of crude fiber.

**Wheat Bran and Wheat Screenings** is the coarse outer coating of the wheat kernel as separated from cleaned and scoured wheat in the usual process of commercial milling plus the various impurities separated from the wheat during the cleaning process, and known collectively as Wheat Screenings. Standard: It must contain not less than 14.50 per cent. of crude protein and 3 per cent. of crude fat, and not more than 10 per cent. of crude fiber. This product must contain not more than 8 per cent. of screenings.

**Wheat Bran and Wheat Scourings** is the coarse outer coating of the wheat kernel as separated from cleaned and scoured wheat in the usual process of commercial milling plus such portions of the cuticle, hair, dust, smut and other materials as are separated from the grain in the usual process of scouring. Standard: It must contain not less than 14.50 per cent. of crude protein and 3 per cent. of crude fat, and not more than 10 per cent. of crude fiber.

**Wheat Gray Shorts** consist of the fine particles of the outer bran, the inner or "bee-wing" bran, germ and the offal or fibrous material obtained in the last reduction of middlings. It is composed of all the shorts or middlings, both the Brown Shorts and the White Shorts and corresponds to the Flour Middlings of the Northwest. Standard: It must contain not less than 15 per cent. of crude protein and 3.50 per cent. of crude fat, and not more than 5.50 per cent. of crude fiber.

**Wheat Brown Shorts** consist mostly of fine particles of bran and germ and contains much less fibrous offal obtained from the "tail of the mill" than does the Wheat Gray Shorts. This corresponds to the Standard Wheat Middlings produced by the Northwestern mills. Standard: It must contain not less than 15 per cent. of crude protein and 3.50 per cent. of crude fat, and not more than 6.50 per cent. of crude fiber.

**Wheat White Shorts** consist of a smaller portion of the fine bran particles and germ and a much greater portion of the fibrous offal from the "tail of the mill" than does Wheat Gray Shorts and corresponds to the Red Dog flour of the Northwest. Standard: It must contain not less than 14.50 per cent. of crude protein and 3 per cent. of crude fat, and not more than 3.50 per cent. of crude fiber.

**Wheat Mixed Feed** consists of Wheat Bran and Wheat Gray Shorts combined in the proportions obtained in the usual process of commercial milling. Feed sold as Wheat Mixed Feed must consist of bran plus Wheat Gray Shorts, or the total feed. It does not consist of bran plus Wheat Brown Shorts, only. Standard: It must contain not less than 16 per cent. of crude protein and 3.50 per cent. of crude fat, and not more than 8.50 per cent. of crude fiber.

If to any of the above brands of feed there is added any "Screenings" or "Scourings," as hereinafter defined, either ground or unground, bolted or unbolted, such brands shall be so registered, labeled and sold, as to clearly indicate this fact. The word "Screenings" or "Scourings," as the case may be, shall appear as part of the name of the brand and shall be printed in the same size and face of type as the remainder of the name. For example, "WHEAT BRAN AND SCOURINGS," not "WHEAT BRAN and scourings."

**Wheat Mixed Feed and Wheat Screenings** shall consist of the wheat bran and wheat gray shorts to which have been added the various impurities separated from wheat during the cleaning process and known collectively as Wheat Screenings. The name of each ingredient—wheat bran, wheat gray shorts and wheat screenings—and the maximum per cent. of screenings, which is 8 per cent., shall appear upon the tag. Standard: It must contain not less than 16 per cent. of crude protein and 3.50 per cent. of crude fat, and not more than 8.50 per cent. of crude fiber.

Similar definitions shall apply to mixtures of **Wheat Gray Shorts and Wheat Screenings, Wheat Brown Shorts and Wheat Screenings, or Wheat White Shorts and Wheat Screenings**, as the case may be, and each must equal the guarantee required for the pure product.

Mixtures of wheat products containing wheat scourings are defined similarly to those in which wheat screenings are used and each must equal the guarantee which is required for the pure product.

**Wheat Screenings** consist of the smaller, imperfect grains, weed seeds, and other foreign materials having a feeding value, separated in cleaning the wheat. (Sand, dirt or other substances without feeding value must be eliminated from screenings before they are added to any feed.)

**Recleaned Wheat Screenings** shall consist of the smaller imperfect grains of wheat after all weed seeds and other foreign materials have been removed.

**Wheat Scourings** consist of such portions of the cuticle, hair, dust, smut and other materials as are separated from the grain in the usual process of scouring.

**Wheat Chops** is the entire berry of sound wheat, chopped. Standard: It must contain not less than 14 per cent. of crude protein and 2 per cent. of crude fat, and not more than 5 per cent. of crude fiber.

### Miscellaneous Products

**Meal** is the clean, sound, ground product of the entire grain, cereal or seed which it purports to represent.

**Chop** is a ground or chopped feed composed of one or more different cereals or by-products thereof. If it bears a name descriptive of the kind of cereals, it must be made exclusively of the entire grains of those cereals.

**Screenings** are the smaller, imperfect grains, weed seeds and other foreign materials having feeding value, separated in cleaning the grain.

**Yeast or Vinegar Dried Grains** are the properly dried residue from the mixture of cereals, malt and malt sprouts (sometimes cottonseed meal) obtained in the manufacture of yeast or vinegar, and consist of corn or corn and rye from which most of the starch has been extracted, together with malt added during the manufacturing process to change the starch to sugars, and malt sprouts (sometimes cottonseed meal) added during the manufacturing process to aid in filtering the residue from the wort and serve as a source of food supply for the yeast.

**Palm Kernel Oil Meal** is the ground residue from the extraction of part of the oil by pressure or solvents from the kernel of the fruit of *Elaeis guineensis* or *Elaeis malanococca*.

**Ivory Nut Meal** is ground ivory nuts.

**Mixed Feed\*** is a mixture of wholesome feeding stuffs. The name and percentage of each ingredient used in the feeding stuff must be stated in the registration. If corn cobs, ground hay, rice hulls, oat hulls, peanut shells, or similar materials are present in the feeding stuff, *the name and percentage of each ingredient must also be shown on the tax tag.*

**Poultry Feed\*** is a mixed feed, and is no exception to the names, definitions and standards set forth in this bulletin. If grit, oyster shell, charcoal, or similar substances be added to this product, it must be shown in the brand name, thus, "POULTRY FEED WITH CHARCOAL." Not more than 2 per cent. of grit and similar material is allowed in poultry feed.

The question of whether it would not be more profitable to purchase grit, oyster shells and charcoal separately rather than in the form of mixtures containing these materials deserves the careful attention of the purchasers of chicken feeds.

**Cocoanut Meal\*** is the ground product obtained after extraction of part of the oil from the dried fleshy portion of the cocoanut (*Cocos nucifera*), termed "copra."

**Velvet Bean Feed\*** is the dried, velvet beans and pods, ground.

**Flaked Velvet Bean Feed\*** is the dried, ground velvet beans with pods, pressed into flakes.

**Velvet Bean Meal\*** is the dried, ground velvet beans without the pods.

**Barley Mixed Feed\*** consists of barley bran and shorts combined in the proportions obtained in the usual process of commercial milling for the manufacture of barley flour. If in the above feed there is contained any barley hulls, screenings, either ground or unground, bolted or unbolted, such feed shall be so registered, labeled and sold, as to clearly indicate this fact. The word "Screenings" or "Hulls" shall appear as part of the name of the brand and shall be printed in the same size and face of type as the remainder of the brand name.

## RULINGS UNDER THE LAW

### In effect on and after September 1, 1918

The law provides that the Director of the Experiment Station shall be empowered to prescribe and enforce such rules and regulations as he may deem necessary to carry into effect the full intent and meaning of the act. In accordance with this provision the following rulings have been promulgated:

1. **Alfalfa Meal or Chopped Alfalfa.**—Mixed feed containing alfalfa meal or chopped alfalfa as one of the ingredients can only be registered so as to show the percentage of alfalfa meal or chopped alfalfa present, which percentage must also appear upon the Texas tax tag.

2. **Mixtures.**—Mixtures of wheat bran and corn bran cannot be registered as Wheat Bran but must be registered as Mixed Bran, Mixed Feed, or some other name not misleading as to the materials used in their manufacture, and the ingredients given as wheat bran and corn bran.

3. **Feeds Containing Screenings.**—Feeds containing Screenings cannot be registered as Wheat Bran, Wheat Shorts, Bran, Shorts, etc., but must be registered as Wheat Bran and Screenings, Mixed Feed, or some other name not indicating distinct by-products of wheat, and the ingredients given as wheat bran and wheat screenings, clover screenings or whatever the materials may be. In all feeds containing screenings the source and condition of the screenings, i. e., whole, crushed or ground wheat screenings, oat screenings, corn screenings, etc., will be required. The general term "grain screenings" will not be accepted. The word "Screenings" shall appear as part of the brand name and shall be printed in the same size and face of type as the remainder of the name. The amount of screenings permissible in feed is limited to 8 per cent. and the quantity present must be stated on the registration form and tax tag.

4. **Screenings.**—Screenings, if sold as such without grinding, need not be registered. If ground, they become a mixed meal and must be registered and labeled.

5. **Mill Run Bran.**—This term has been generally used to cover a mixture of wheat bran and wheat shorts. Such mixtures will now be accepted for registration only under the name of Wheat Mixed Feed, Mixed Feed, or some other name not indicating a single by-product of the wheat grain. The ingredients should be given as wheat bran and wheat gray shorts.

6. **Feed Meal.**—This material must be registered and tagged when sold, offered or exposed for sale in Texas. When used as an ingredient of a compound feed it must be given in the list of ingredients. When used in conjunction with the siftings from any cereal the name of the cereal must prefix the term "feed meal."

7. **Corn Cockle.**—Corn Cockle will be considered an adulterant if present in appreciable amounts in a feed offered or exposed for sale or sold in this State.

8. **Oat Feed.**—This term will not be accepted when used to indicate any material other than whole or ground oats. Mixtures of oat shorts, oat middlings, oat bran and oat hulls will not be accepted under the term and the name of each separate ingredient will be required. Mixtures containing oat hulls will be considered adulterated unless the percentage of each ingredient present is stated on the registration form and tax tag.

9. **Seeds, Field Seeds, Miscellaneous Seeds.**—These terms will not be accepted in the list of ingredients to cover a mixture of seeds. When seeds are used the common name of each variety of seed must be given on the registration form. If the seeds are separated from screenings the source of the screenings will be required, i. e., Field seeds from wheat screenings, clover screenings, etc.

10. **Grits.**—This term used as an ingredient of a feed will be considered to mean the small pieces of the hard, flinty portion of Indian corn obtained as a by-product in the manufacture of corn products. If used to cover products from any other cereal the name of the cereal from which it is obtained must precede the word "grits" in the registration certificate.

11. **Grit.**—This term used as an ingredient of a feeding stuff will be considered to mean the rough, hard particles of limestone, quartz, mica, gravel, etc., used in poultry foods. It should be preceded on the registration form by the name of the material used, i. e., limestone grit, quartz grit, mica grit, etc.

12. **Inert Materials.**—It is permissible to use grit, oyster shells, charcoal and similar materials in compounding poultry feeds, providing, that not more than two (2) per cent. of such inert material is used.

The words "charcoal," "grit," etc., must constitute a part of the brand name of all feeds containing these ingredients and must be printed in the same style and face of type as the balance of the name, i. e., EXCELSIOR POULTRY FEED WITH GRIT AND CHARCOAL. The percentages of all ingredients of feeds containing grit, oyster shells and similar substances must be shown on the official tag. When charcoal alone is present the percentage of charcoal only

is to be given except when the feed contains some material classed as an adulterant.

13. **Corn Chops and Corn Bran.**—Mixtures of corn chops and corn bran must be registered and tagged so as to show the percentage of added corn bran present.

14. **Brand Names.**—The registration of two or more feeds under the same brand name by a manufacturer will not be accepted.

15. **Redemption of Tax Tags.**—When tags are printed in error by the manufacture, or if for any reason not in correct form, they will be redeemed by the Division at their full value less the original cost of the tags.

16. **Transfer of Tags.**—Since under the law tags are good until used a person or firm succeeding a firm which has registered feeding stuffs for sale may use any tags secured in the transfer, providing, said tags are blank on the reverse side and proper registration is made by the successor who must subsequently have the tags printed for his own use. In the event that the transfer involves the purchase of printed tags, such tags cannot be used by the successor but may be redeemed as under Ruling 15.

17. **Clubs, Associations, Etc.**—When a number of consumers form a club or association and purchase feeding stuffs either from within or without the State such feeds must be registered and tagged when delivery is made to the individual members of the club or association. *The person or persons ordering such feed or to whom it is consigned will be held responsible for failure of any such shipments to meet all the requirements of the Texas feed law.*

18. **Changing Guarantees.**—Guarantees either as regards composition or ingredients can only be changed by the submission of "Registration Adjustment Clause" properly executed. *Under no circumstances should the guarantee be changed without first obtaining authority from this Division.*

19. **Reregistration.**—Manufacturers, importers and all persons who have registered feeding stuffs for sale in Texas are requested to note that a registration of a feed is permanent and reregistration during the fiscal year without a change in brand name will not be permitted unless reasons satisfactory to this Division are given for such reregistration. The substitution of inferior materials in a registered feed will not be considered as justifying reregistration without a change in name.

20. **Use of Rubber Stamp.**—Attention is called to the fact that all information on the tax tag must be printed. *The use of rubber stamp for this purpose will not be permitted.*

21. **Samples Equal to Guarantee.**—Inspection samples found equal to the guarantee in every respect will be reported to the manufacturer, distributor, agent, and dealer from whom the sample is obtained as soon as the analysis of the sample is completed.

22. **Samples Not Meeting Guarantee.**—In the case of appreciably deficient or of adulterated samples the manufacturer is given ten days' advance notice in which to file objections. A portion of the official sample is furnished if requested. As soon as the deficiency or adulteration is detected, the agent or person offering the feed for sale is notified and advised to remove it from sale. Those failing to accept this advice will be reported for violation of the law.

23. **Relabeling Shipments.**—Permission will be granted for the relabeling of deficient shipments only in special cases where reasons satisfactory to this office for the deficiency and relabeling are presented. Dealers will be advised to return to manufacturer all shipments which are adulterated.

24. **Deficiency in More Than One Constituent.**—Inspection samples showing deficiency in more than one constituent, even though the deficiency may not be large, will be reported as sold in violation of the law and the dealers will be advised to withdraw such shipments from sale.

25. **Discarding or Substituting Samples.**—All requests for discarding or substituting samples will be refused unless error on the part of this Division can be shown.

26. **Prosecutions.**—Original shippers of feeds will be prosecuted in all cases where it is possible to do so either under the State Law or through cooperation with the United States Department of Agriculture under the Federal Food and Drugs Act. *Local dealers*, however, are directly responsible under the law for the feed they offer for sale and will be held accountable for failure of such feed to meet the requirements of the law, especially for selling a feed when notified to withdraw it from sale.

27. **Cottonseed Feed Meal.**—Mixtures of cottonseed meal and cottonseed hulls will *not* be registered under the name of Cottonseed Feed Meal. Mixtures of this nature will be accepted for registration under the name of Cottonseed Feed, in accordance with definitions and standards adopted for this product. The maximum percentages of cottonseed hulls permissible in the various grades of cottonseed feed must be stated on the registration form and tax tags.

28. **Cottonseed Hull Bran.**—This term will *not* be accepted in the list of ingredients to cover ground cottonseed hulls or delinted cottonseed hulls. When these are used they must be named as such.

29. **Duplicating Samples from the Same Shipment.**—Requests for duplication of samples from the same shipment will receive consideration only when accompanied by satisfactory evidence of irregularity in the drawing of the sample to which objection is made.

30. **Statement of Ingredients.**—The attention of those desiring to register feeds for sale in the State is especially directed to the requirement of the law regarding the declaration of ingredients. Each and every substance used in compounding feed must be given in the list of ingredients without regard to the purpose for which it may be used.

31. **Ingredients from Screenings.**—Manufacturers must not certify that cereals are used in certain feeds when as a matter of fact they were not added separately but incidentally as a part of the grain screenings. In such cases the cereals present should be included under the terms whole, ground, or crushed screenings from wheat, barley, oats, etc., as the case may be.

32. **Net Weight.**—Some manufacturers are in error as to the weight requirement of the tax tag and are using it as the gross and not the net weight required by law. *The contents of the package must equal the amount certified on the tag and this net weight must always be printed on the reverse side of said tag.*

33. **Fees.**—The law requires that the agent or person registering feeds shall, before the articles are offered for sale, pay an inspection tax of ten cents per ton for each ton sold or offered for sale in the State. Fees should accompany tag orders and be sent in the form of money order, certified check or bank exchange. *Personal checks cannot be accepted unless they are certified.* In case it is not convenient to remit as suggested above, tags may be sent C. O. D.

34. **Private Tags.**—Shipments have been found bearing not only the official Texas tax tag but also a private firm tag containing statements in conflict with those on the official tag. The Texas tax tag which should be attached to each package of feed and accompany bulk shipments, contains all the information required by law and private tags should be omitted from shipments into this State. Shipments having private tags containing statements not in accord with official tags will be considered misbranded and dealers advised to remove same from sale. *Statements on container should also agree with those on the official tag attached.*

35. **Rebates.**—The Texas feed law makes no provision for the payment of rebates to cover deficiencies and, although this practice often shows the good intentions of the manufacturer, the payment of such rebates will have no bearing on any subsequent action which may be taken in cases of violation of the

law. When rebates are paid, dealers will be required to prorate them to the purchasers so that the consumers may receive their benefit. *The payment of rebates never fully remunerates the consumer for being furnished feed which is deficient in valuable nutrients, and manufacturers are advised to be certain in advance that shipments are up to the guarantee in every particular.*

36. **Federal Inspection.**—In cooperation with the United States Department of Agriculture, all *interstate shipments* of feed showing appreciable deficiencies or adulteration will be sampled under the Federal Food and Drugs Act.

37. **Cold Pressed Cottonseed.**—This product resulting from subjecting the undecorticated cottonseed to pressure for extraction of the oil will *not* be accepted under the names of Cold Pressed Cottonseed Cake and Cold Pressed Cottonseed Meal but when *unground* will be registered as Cracked Cold Pressed Cottonseed and when *ground* as Ground Cold Pressed Cottonseed.

38. **Humus.**—This term will *not* be accepted in the list of ingredients to cover peat. The proper designation is charred peat and the word "peat" must constitute a part of the brand name of all feeds containing this ingredient and must be printed in the same style and face of type as the balance of the name, i. e., PRIMO MOLASSES FEED WITH PEAT. The percentages of all ingredients of feeds containing peat must be stated on the registration form and printed on the official tax tag.

## RULINGS OF THE UNITED STATES FOOD ADMINISTRATION AFFECTING FEEDING STUFFS

### Wheat Products

The principal ruling affecting the prices of wheat products, becoming operative December 25, 1917, is known as Rule 19 and is as follows:

"Rule 19. No licensee engaged in the business of milling flour and feed from wheat shall after December 25, 1917, sell wheat mill feed at any price in excess of the following prices:

"Bulk price per ton of 2,000 pounds at mill in carloads in no case shall exceed 38 per cent. of the average cost to such mill of one ton of wheat at the mill, which cost of wheat shall be the average cost as shown by the previous month's records of said mill and shall include the 1 per cent. administration fee paid by the mill on all wheat ground.

"Differentials (maximum prices, bulk, mill). Basis bran:

	Per ton of 2,000 lbs. over basis
Shorts or Standard Middlings.....	\$ 2.00
Mixed Feeds .....	4.00
Flour Middlings .....	9.00
Red Dog .....	15.00

"The above percentages on prices are subject to revision from time to time by the United States Food Administrator, but no revision will be made without thirty days' notice.

"The price f. o. b., bulk, mill, in carload lots shall be on the basis of cash or draft attached to bill of lading and all feed sold by the licensee shall be invoiced at such price. There shall also appear on the invoice, in addition to such price, f. o. b. mill, the price of the sacks and items of freight and interest, if any, when goods are sold on extended terms or credit, and other charges, but the licensee, for convenience in selling, may quote a delivered price in sacks. This rule shall not affect existing contracts.

"This rule aims to establish a relation between the price of mill feeds and the price of wheat. It is made necessary by the unusually high price of coarse grains, which has caused unprecedented demand for mill feeds.

"In view of possible larger movement of the coarse grains, which would naturally result in a decrease in the demand for and price of mill feed, which

in turn would tend to advance the price of flour, it is necessary at this time to adjust the price of mill feed rather than trust to a rigid and unjust arrangement at a later date."

In May, 1918, the Food Administration issued the following revised price regulations for wheat mill feed:

"Rule 19 is hereby amended to read as follows:

"Rule 19. No licensee engaged in the business of milling flour and feed from wheat, shall sell wheat mill-feed at any price in excess of the following prices:

"Bran: Bulk price per ton of 2,000 pounds at mill, in earloads, in no case shall exceed 38 per cent. of the average cost to such mill of one ton of wheat at the mill, which cost of wheat shall be the average cost shown by the previous month's records of said mill, including all buying expenses.

"Differentials (maximum prices, bulk, mill). Basis bran:

"Shorts, Standard Middlings, Gray Shorts, Gray Middlings, Flour Middlings, or Red Dog, \$2 per ton of 2,000 pounds over basis. Mixed feed containing all of the wheat not ground into flour, \$1.25 per ton of 2,000 pounds over basis.

"Note. Screenings may be added to any of the above authorized feeds, provided the screenings admixture does not exceed mill run.

"The foregoing prices shall apply to sales in carload lots f. o. b., bulk, mill, cash or draft attached to bill of lading, and all feed sold by the miller shall be invoiced at such price. There shall also appear on the invoice, in addition to such price f. o. b. mill, the price of the sacks and items of freight and interest, if any, when goods are sold on extended terms or credit, but the miller for convenience in selling may quote a delivered price in sacks. The above price shall include any brokerage or commission paid, or other items of expense, and shall apply to all wheat mill-feeds sold in carload lots from the mill, no matter to whom sold.

"In selling less than carload lots to wholesale dealers in feeds, the miller may add not to exceed fifty cents per ton to the foregoing prices.

"In selling less than carload lots and in ton lots or over to retailers in feed, the miller may add not to exceed \$1.00 per ton to the foregoing prices.

"In selling less than carload lots to retailers in feeds, the miller may add not to exceed \$1.50 per ton to the foregoing prices.

"Note. Not more than one of these three margins shall be added in the case of any one lot of feed.

"In selling to consumers in less than carload lots, the miller may charge a reasonable retailer's profit not to exceed such maximum as may be indicated by the Federal Food Administrator for the state where the retailer is located, but in such case he shall add no other margin to the price named in this rule.

"In case the miller performs a jobbing service and maintains a separate jobbing department established prior to August 10, 1917, or maintains a feed warehouse in the town where he has no mill, he may, if he first obtains the written permission of the United States Food Administrator, add to the price named in this rule the margins permitted to other jobbers of wheat mill-feed, but in such event he shall not be entitled to add any of the margins hereinbefore indicated for sales in less than carload lots."

Wheat mill-feeds are not offered freely in Texas at the present time. The supplies of wheat bran and wheat shorts have been very much decreased owing to the increased production of flour per bushel of wheat and to the actual decreased milling of wheat. Owing to the scarcity of wheat products, it has become necessary to use substitute feeds wherever possible.

#### SCHEDULE OF PRICES FOR COTTONSEED PRODUCTS, 1917-1918.

Among the first notable achievements of the Federal Food Administrator for Texas was the bringing together of the cattle raisers and the cottonseed millers during the fall of 1917, when the cottonseed crushers and cattlemen agreed on prices for cottonseed products which resulted in saving hundreds of thousands of cattle in the drouth-stricken area of West Texas. The schedule was an emergency one and the prices were arranged within the industry and not by

the Food Administration. This step meant so much to Texas that the contiguous States of Louisiana, Arkansas, Oklahoma, Tennessee and Mississippi joined hands with Texas and fixed similar prices which were not prohibitive for the cattlemen.

The following memorandum of agreement was adopted at a joint conference between the cattle raisers and cottonseed crushers which was held in Houston, Texas, November 15, 1917.

### Resolution as Adopted

*"Honorable E. A. Peden, Federal Food Administrator for Texas.*

"DEAR SIR: We, your committee this day appointed to make recommendations on the subject of pricing cottonseed cake, beg to report as follows:

"That the committee representing the Texas Cottonseed Crushers' Association, acting unanimously and the committee of like number representing the Cattle Raisers' Association of Texas, with one dissenting vote, have reached agreement as follows:

"That a maximum price of \$50.00 per ton for loose cracked cake and \$53.50 per ton for sacked cake, on the basis of 43 per cent. protein be adopted. This price is based f. o. b. mill.

"It is further agreed that inspection and sampling by agents of the State Feed Control Service be made at points of origin, and in all cases where the protein content upon analysis by the State authorities is found to run above or below the 43 per cent. an adjustment of the difference in price made by Professor B. Youngblood of College Station shall be accepted by seller and purchaser, and settlement made accordingly.

"This agreement to apply to the entire crush of this season except so much thereof as may have been sold previous to this date where such sales are evidenced by written contract or confirmation. This agreement is intended as a relief measure for the live stock in the drouth-stricken areas of the country, the owners who are in distress, and to give them preference over all others.

"We realize that if relief is to come it must come quickly. The material now within the State furnishes the quickest means of averting disaster.

"We, therefore, unanimously request the Food Administrator to direct all shipments of such material destined for points outside of the State, or points in other States not drouth-stricken area, to such drouth-stricken areas until, in the opinion of the Food Administrator, normal conditions have returned.

"(Signed) JAMES CALLAN,  
Chairman for Cattle Raisers.  
"(Signed) C. G. LITTLETON,  
Chairman for Cottonseed Crushers."

Although the terms of the above agreement imposed a heavy burden upon the Division of Feed Control Service, the matter was approached in a patriotic spirit and we have every reason to believe that our cooperation was appreciated by both associations interested as well as by the Federal Food Administrator for Texas.

It was first agreed that adjustment covering excess or deficiency of protein should be made on a basis of \$1.25 per unit of protein, but at conferences similar to the Houston meeting, which were held in contiguous States the agreement reached in each State called for an allowance of \$1.00 per unit of protein *pro et contra*. The following ruling was therefore promulgated on December 24, 1917, and a copy was sent to each manufacturer of cottonseed products doing business in Texas:

"At the request of Mr. E. A. Peden, Federal Food Administrator for Texas, and Secretary E. B. Spiller, of the Cattle Raisers' Association of Texas, we are pleased to conform to the agreement reached in other States and promulgate the following ruling:

"Adjustment covering excess or deficiency of protein shall be made on a basis of \$1.00 per unit of protein and no claim for excess or deficiency of protein shall be made unless the variation shall equal or exceed one-half of one per

cent., and on this basis settlement shall be made on *pro rata* excess or deficiency of protein.

"This ruling shall become effective December 26, 1917.

"(Signed) B. YOUNGBLOOD, Director,  
Texas Experiment Station.  
"(Signed) F. D. FULLER, Chief,  
Division of Feed Control Service."

During the crushing season of 1917-1918, inspectors of this Division secured official samples of 2619 carloads of cottonseed products at points of origin. These sample were analyzed under the direction of Dr. G. S. Fraps, Chemist, Experiment Station, and State Chemist, and copies of the certificates of analysis were sent to shippers and consignees, with proper notation on each concerning refund or overage.

In Table 1 will be found the name and address of manufacturer, protein guarantee, and average protein content of the number of carloads of cottonseed products inspected under the terms of the Houston agreement. Inasmuch as each car contained approximately thirty tons, the work represents the inspection of 78,570 tons of cottonseed products.

## STANDARDS FOR TEXAS COTTONSEED PRODUCTS

A study of the foregoing table reveals the fact that Texas cottonseed products are of high quality. Nowhere in the country is produced such valuable cottonseed meal and cake as in this State. Texas leads all other states in the Union in the manufacture of high-grade by-products of the cottonseed oil industry. This is due to the fact that Texas cottonseed is of exceptional quality.

It is not surprising, therefore, that the standards for Texas cottonseed products are higher than in other states. On pages 17 and 18 will be found the standards which have been adopted by the Division of Feed Control Service and approved by the Texas Cottonseed Crushers' Association. Attention is directed to the fact that any cottonseed product carrying less than 43 per cent. of crude protein must be tagged and sold as Cottonseed Feed, a mixture of cottonseed meal and cottonseed hulls containing from 10 to 25 per cent. of the latter product.

Very few states have adopted standards for cottonseed products and in some states it is permissible to sell cottonseed meal as such if it has a protein content of only 36 per cent. Many states recognize a 41 per cent. protein article as Choice Cottonseed Meal, while Prime Cottonseed Meal can be sold under a guarantee of 38.5 per cent. of protein.

The high quality of Texas cottonseed meal should command a premium over cottonseed meal produced in other states, if so designated. There is an ever increasing tendency on the part of consumers to purchase feeding stuffs of quality and feeders are learning to distinguish between the different grades of cottonseed products on the Texas market. Cottonseed products are no exception to other feeds and sooner or later all feeding stuffs will be sold on their merits.

As stated above, Texas cottonseed kernels are of exceptional quality. The Association of Feed Control Officials of the United States has recently collected and analyzed cottonseed grown in several states. It is interesting to note the results which are as follows:

Table 2.—Partial Analyses of Cottonseed Kernels.

## COOPERATION WITH THE U. S. DEPARTMENT OF AGRICULTURE.

On March 9, 1912, the Director received a commission from the United States Department of Agriculture to collect samples of feeding stuffs and other products as defined in the Texas feeding stuffs law, which are manufactured or offered for sale in the District of Columbia or in any state or territory of the United

States, or which shall be offered for sale in unbroken packages in any state other than that in which they shall have been respectively manufactured or purchased, for examination under the direction or supervision of the Bureau of Chemistry, at Washington, D. C.

By means of this appointment the Director of the Experiment Station and his assistants are authorized to procure samples under the Federal Food and Drugs Act without the necessity of waiting, as previously, for the services of a federal inspector, and by this commission we are in a much better position to control interstate shipments and protect the purchaser who buys feeding stuffs manufactured outside of the State of Texas.

Acting under authority of this commission, therefore, all interstate shipments showing deficiencies or adulterations sufficient to justify, are sampled not only under the Texas feed law, but also under the Federal Food and Drugs Act of 1906. This Division has no control over federal samples or subsequent proceedings which may be taken under the federal law, nor do said samples or proceedings in any way affect proceedings against local dealers or manufacturers under the Texas feed law.

#### SHIPMENTS WITHDRAWN FROM SALE

On April 1, 1918, a systematic effort was made to advise all dealers to withdraw from sale all shipments which did not conform to the requirements of the feed law of Texas, until such a time when they could be legally sold.

The following shows a summary of the feeds withdrawn from sale since April 1, 1918, and gives the number of shipments withdrawn, number of manufacturers represented together with the amount withdrawn and the reason for advising removal from sale.

Table 3.—Shipments Withdrawn From Sale

No. of shipments withdrawn from sale	No. of manufacturers represented	No. of towns represented	Reason for withdrawal from sale	Amount withdrawn, pounds
114	60	63	Not tagged....	1,269,256
22	16	14	Misbranded....	431,305
Totals..... 136	76	77	.....	1,700,561

#### CASES REPORTED TO COUNTY ATTORNEYS

In connection with prosecutions, it is to be noted that it is the duty of the Division of Feed Control Service to file complaints in cases which it considers advisable and for the county attorney of the district in which the violation occurs to conduct proceedings.

It is the opinion of the Division that very few cases result from wilful violation of the law. Carelessness on the part of employees and ignorance of the requirements of the law are responsible for most violations but prosecution is necessary in many cases to put a stop to careless practices. Non-tagging is a violation which usually results from confusing private tags with official tax tags. Prosecution often follows when a dealer continuously violates the law by selling feed which is not officially tagged.

The following cases were certified during the year ending August 31, 1918:

Table 4.—Cases Reported to County Attorneys

Name of Defendant	Address	Violation	No. of affidavits filed	Result
J. E. Broussard, Pres., Beaumont Rice Mills	Beaumont.....	Incorrect guarantee	3	1. Conviction 2. Nolle Pros. 3. Pending
P. G. Sackenreuther, Mgr., P. G. Sackenreuther Co.	Houston.....	Incorrect guarantee	1	Pending
R. Schwethelm, Mgr., Union Grain and Feed Co.	San Antonio...	Incorrect guarantee	1	Pending
H. Maruchau, Pres., H. Maruchau Grain Co.	San Antonio...	Short weight, Adulteration	2	Conviction
E. Buescher, Mgr., Smithville Oil Mill Co.	Smithville.....	Incorrect guarantee	1	Conviction
A. Power, Agt., Memphis Cotton Oil Co.	Memphis.....	Incorrect guarantee	1	Conviction
S. D. Burt, Mgr., Orange Rice Mill Co.	Orange.....	Incorrect guarantee	1	Pending
Julius H. Pearlstone, Pres., Palestine Grain Co.	Palestine.....	Adulteration	1	Conviction

### TENTATIVE GUARANTEES FOR FEEDS.

The following table shows tentative guarantees which may be used in registering feeding stuffs for sale in Texas. It is to be understood, however, that if these guarantees are used by manufacturers this Division will not be responsible in the event that analyses of official samples show that the guarantees are inaccurate.

Table 5.—Tentative Guarantees

Name of Feedstuff	Crude Protein not less than per cent.	Crude Fat not less than per cent.	Nitrogen-free Extract not less than per cent.	Crude Fiber not more than per cent.
Alfalfa Meal.....	12.00	1.00	36.00	30.00
Barley Chops.....	11.00	1.50	65.00	6.00
Beet Molasses.....	3.50		59.00	
Beet Pulp.....	8.00	.50	55.00	20.00
Blood, Dried.....	84.00	1.00	3.00	2.00
Brewers' Dried Grains.....	24.00	6.00	40.00	18.00
Corn Bran.....	8.00	5.00	60.00	12.00
Corn Chops.....	9.00	3.50	70.00	3.00
Corn Cob.....	2.00	.50	50.00	34.00
Corn Feed Meal.....	8.00	3.00	67.00	3.00
Corn, Ear Chops.....	8.00	3.00	64.00	8.00
Corn, Ear Chops with Shuck.....	7.75	2.75	62.00	10.00
Cottonseed Chops.....	20.00	17.00	25.00	20.00
Choice Cottonseed Meal.....	48.00	7.00	23.00	9.00
Choice Cottonseed Cake.....	48.00	7.00	23.00	9.00
Prime Cottonseed Meal.....	45.00	6.00	23.00	10.00
Prime Cottonseed Cake.....	45.00	6.00	23.00	10.00
Ordinary Cottonseed Meal.....	43.00	6.00	24.00	12.00
Ordinary Cottonseed Cake.....	43.00	6.00	24.00	12.00
Cottonseed Feed No. 4 (Ground).....	41.20	5.00	24.00	14.00
Cottonseed Feed No. 4 (Cracked).....	41.20	5.00	24.00	14.00
Cottonseed Feed No. 5 (Ground).....	38.50	5.00	24.00	18.00
Cottonseed Feed No. 5 (Cracked).....	38.50	5.00	24.00	18.00
Cottonseed Feed No. 6 (Ground).....	36.00	5.00	25.00	22.00
Cottonseed Feed No. 6 (Cracked).....	36.00	5.00	25.00	22.00
Choice Cold Pressed Cottonseed.....	28.00	7.00	28.00	23.00
Prime Cold Pressed Cottonseed.....	25.00	7.00	28.00	25.00
Choice Cold Pressed Cottonseed (Ground).....	28.00	7.00	28.00	23.00

Table 5.—Tentative Guarantees—Continued.

Name of Feedstuff	Crude Protein not less than per cent.	Crude Fat not less than per cent.	Nitrogen- free Extract not less than per cent.	Crude Fiber not more than per cent.
Prime Cold Pressed Cottonseed (Ground).....	25.00	7.00	28.00	25.00
Cottonseed Hulls.....	3.00	.50	30.00	50.00
Feterita Chops.....	11.00	2.75	69.00	3.00
Feterita Head Chops.....	10.00	2.50	64.00	8.00
Hominy Feed.....	10.00	6.00	60.00	7.00
Kafir Chops.....	9.00	2.50	69.50	3.50

Wheat Chops.....	12.00	2.00	70.00	3.00
Wheat Mixed Feed.....	16.00	3.50	55.00	8.50
Wheat Gray Shorts.....	15.00	3.50	57.00	5.50
Wheat Brown Shorts.....	15.00	3.50	55.00	6.50
Wheat White Shorts.....	14.50	3.00	60.00	3.50

## PRINTING OF TAGS

The Division of Feed Control Service will, under no circumstances, print tags, but for the convenience of manufacturers this work may be done by commercial printers in Bryan, Texas. The Division will have this printing done only on request of the manufacturer.

In case the tags are to be printed in Bryan, do not include the charge for printing in remittance sent in payment of tags. Remit separately to the printers for charges covering printing or allow the printers to bill you direct.

## ALPHABETICAL LIST OF MANUFACTURERS REGISTERED

The following is an alphabetical list of all firms registered with the Division of Feed Control Service, September 1, 1918. By noting the address of any given firm, then referring to Table 7 showing the analyses, the different feeds registered by any firm doing business in Texas may be found.

Aaron, T. M., Quail, Texas.

Abbott, E. C., Caldwell, Texas.

Abernathy Coal & Grain Company, Abernathy, Texas.

Abernathy Corn Mill, Abernathy, Texas.

Abernathy, E. M., Lexington, Oklahoma.

Abilene Milling Company, Abilene, Kansas.

Abilene Flour Mills Company, Abilene, Kansas.

Acme Mill, Houston, Texas.  
Acme Milling Company, Oklahoma City, Oklahoma.  
Acme Roller Mills, Leonard, Texas.  
Ada Milling Company, Ada, Oklahoma.  
Aetna Mill & Elevator Company, Wellington, Kansas.  
Ahrenbeck Mill & Manufacturing Company, Navasota, Texas.  
Ainsa, M., & Sons, Inc., El Paso, Texas.  
Alabama Black Belt Company, Montgomery, Alabama.  
Alabama Velvet Bean Mills, Georgiana, Alabama.  
Alamo Lumber Company, Uvalde, Texas.  
Alamo Oil & Refining Company, San Antonio, Texas.  
Alexandria Cotton Oil Company, Alexandria, Louisiana.  
Alfalfa Meal & Milling Company, Cherokee, Oklahoma.  
Alfalfa Milling Company, Byron, Oklahoma.  
Alice Cotton Oil Company, Alice, Texas.  
Allen, E. A., Groesbeck, Texas.  
Allen, G. M., Hermleigh, Texas.  
Allen, J. B., Glen Cove, Texas.  
Alliance Milling Company, Denton, Texas.  
Allneeda Mills Company, East St. Louis, Illinois.  
Alto Cotton Oil Company, Alto, Texas.  
Altus Alfalfa Milling Company, Altus, Oklahoma.  
Altus Cotton Oil Mill, Altus, Oklahoma.  
Alva Roller Mills, Alva, Oklahoma.  
Alvarado Cotton Oil Mill, Alvarado, Texas.  
Amarillo Commercial Company, Amarillo, Texas.  
American Alfalfa Food Company, Wichita, Kansas.  
American Beet Sugar Company, Chino, California.  
American Brewing Association, Houston, Texas.  
American Coal & Grain Company, Amarillo, Texas.  
Amsler's, C., Estate, Hempstead, Texas.  
American Hominy Company, St. Joseph, Missouri.  
American Linseed Company, Chicago, Illinois.  
American Linseed Company, St. Louis, Missouri.  
American Rice Milling Company, Crowley, Louisiana.  
Anchor Mills, Waco, Texas.  
Anderson Brothers Roller Mills, Cleburne, Texas.  
Anderson & Hannah Mill Company, Sulphur, Oklahoma.  
Anderson, O. T., & Company, Olney, Texas.  
Andreas & Peters, El Paso, Texas.  
Andrews, W. A., Eliasville, Texas.  
Andrews, W. A., & Sons, Necessity, Texas.  
Anthony Milling Company, Anthony, New Mexico.  
Anthony-Keeler Grain Company, May, Texas.  
Apache Cotton Oil & Manufacturing Company, Chickasha, Oklahoma.  
Apache Milling Company, Apache, Oklahoma.  
Appleby, W. O., Carnegie, Oklahoma.  
Anadarko Milling Company, Anadarko, Oklahoma.  
Anaheim Sugar Company, Anaheim, California.  
American Seed Company, Fort Worth, Texas.  
Arendell Brothers, Stephenville, Texas.  
Archer Grain & Lumber Company, The, Purcell, Oklahoma.  
Ardmore Milling Company, Ardmore, Oklahoma.  
Arapaho Mill & Elevator Company, Arapaho, Oklahoma.  
Arkadelphia Milling Company, Arkadelphia, Arkansas.  
Arlington Light, Power, Ice & Water Company, Arlington, Texas.  
Arkansas Milling Company, Denton, Texas.  
Arizona Egyptian Cotton Company, Phoenix, Arizona.  
Arizona Alfalfa Mill Company, Phoenix, Arizona.  
Arkansas City Milling Company, Arkansas City, Kansas.  
Armengol, J., Laredo, Texas.

Armour Fertilizer Works, Fort Worth, Texas.  
Armstrong, T. H., Mission, Texas.  
Arnold, H. G., Silvertown, Texas.  
Artesia Alfalfa Milling Company, Artesia, New Mexico.  
Ashby & Sons, Leavenworth, Kansas.  
Ash Grove Milling Company, Ash Grove, Missouri.  
Athens Cotton Oil Company, Athens, Texas.  
Atlantic Rice Mills Company, Beaumont, Texas.  
Atlas Oats Company, Kansas City, Missouri.  
Attica Mills, Attica, Kansas.  
Attringer, H., Mill, Stratford, Texas.  
Aubrey Milling Company, Aubrey, Texas.  
Aunt Jemima Mills Company, St. Joseph, Missouri.  
Aunt Patsy Poultry Feed Company, Memphis, Tennessee.  
Aurora Milling Company, Aurora, Missouri.  
Austin Oil Manufacturing Company, Austin, Texas.  
Austin Mill & Grain Company, Brownwood, Texas.  
Austwell Oil Mill, Austwell, Texas.  
Ayers, F. C., Mercantile Company, Denver, Colorado.  
  
Baden-Vilm Milling Company, Winfield, Kansas.  
Badge-Johnson Company, Burnet, Texas.  
Baker Cotton Oil Company, Altus, Oklahoma.  
Baker, J. W., Conroe, Texas.  
Baker Brothers, Prosper, Texas.  
Baker Milling Company, Claude, Texas.  
Ball & Gunning Milling Company, Webb City, Missouri.  
Ballinger Corn & Feed Mill Company, Ballinger, Texas.  
Ballinger Cotton Oil Company, Ballinger, Texas.  
Balzer Brothers, Sagerton, Texas.  
Bardin, A., Higgins, Texas.  
Bardwell Oil Mill, Bardwell, Texas.  
Barnhart Mercantile Company, Denison, Texas.  
Barteldes Seed Company, Oklahoma City, Oklahoma.  
Bartlett Oil Mill, Bartlett, Texas.  
Barton County Flour Mills, Great Bend, Kansas.  
Barrett, C. W., & Son, Temple, Texas.  
Barry Milling Company, Barry, Texas.  
Barwell, J. W., Waukegan, Illinois.  
Bastrop Milling Company, Bastrop, Texas.  
Bates, James A., Leonard, Texas.  
Bawden, D., & Son, Yukon, Oklahoma.  
Bay City Rice Milling Company, Bay City, Texas.  
Beasley, D. C., Arthur City, Texas.  
Beatrice Corn Mills, Lincoln, Nebraska.  
Beatrice Milling Company, Whitewright, Texas.  
Beaumont Rice Mills, Beaumont, Texas.  
Becker & Company, Brenham, Texas.  
Becker, John, Company, Belen, New Mexico.  
Beeville Cotton Seed Oil Mill Company, Beeville, Texas.  
Bell Grain Company, Crowell, Texas.  
Bellevue Roller Mills, Bellevue, Texas.  
Bells Mill & Grain Company, Bells, Texas.  
Bellville Cotton Oil Company, Bellville, Texas.  
Bellville Mercantile Company, Bellville, Texas.  
Belton Mill & Grain Company, Belton, Texas.  
Belton Oil Company, Belton, Texas.  
Bencini Cotton Oil Mill, Brady, Texas.  
Bencini Cotton Oil Mills, Brownwood, Texas.  
Bencini Cotton Oil Mills, Coleman, Texas.  
Bencini Cotton Oil Mills, Dublin, Texas.

Bencini Cotton Oil Mills, Hamilton, Texas.  
Bencini Cotton Oil Mills, Hico, Texas.  
Bencini Cotton Oil Mills, Stephenville, Texas.  
Bennington Grain & Elevator Company, Bennington, Oklahoma.  
Bernheimer, Marcus, Flour Mills, Clinton, Missouri.  
Berry, D. C., St. Jo, Texas.  
Berry, J. W., Snyder, Texas.  
Berryman & Watters, Alto, Texas.  
Bertram Light & Power Company, Bertram, Texas.  
Best-Clymer Manufacturing Company, Fort Smith, Arkansas.  
Besterio, M., Brownsville, Texas.  
Bewley Mills, Fort Worth, Texas.  
Bible, Cecil, Bible, Texas.  
Bigham, H. V., Roaring Springs, Texas.  
Binding-Stevens Grain Company, Tulsa, Oklahoma.  
Binger Elevator Company, Binger, Oklahoma.  
Bishop Manufacturing Company, Bishop, Texas.  
Bissett, H. J., Skidmore, Texas.  
Black, J. W., Justin, Texas.  
Black & Braly, Leonard, Texas.  
Black Brothers, Beatrice, Nebraska.  
Blair Elevator Company, Atchison, Kansas.  
Blair Milling Company, Atchison, Kansas.  
Blackwell Mill & Elevator Company, Blackwell, Oklahoma.  
Blackwell Grain Company, Blackwell, Oklahoma.  
Blaine County Mill & Elevator Company, Geary, Oklahoma.  
Blanco Roller Mills & Gin Company, Blanco, Texas.  
Bleich, M. N., Galveston, Texas.  
Blooming Grove Cotton Oil Company, Blooming Grove, Texas.  
Blossom Oil & Cotton Company, Blossom, Texas.  
Blount, D. E., Pittsburg, Texas.  
Blue Jacket Grain Company, Blue Jacket, Oklahoma.  
Blue Star Elevator Company, San Antonio, Texas.  
Blum Roller Mills Company, Blum, Texas.  
Bias, R. B., Fuel Company, El Paso, Texas.  
Bobbitt Mill & Grain Company, Madill, Oklahoma.  
Bogatto, A. L., La Marque, Texas.  
Bolin-Hall Milling Company, Liberal, Kansas.  
Booth, F. I., Booth, Texas.  
Border Queen Milling Company, Caldwell, Kansas.  
Boren, J. R., Tulia, Texas.  
Bostick, John, Lampasas, Texas.  
Boston, H. B. & W. M., Arlington, Texas.  
Bounds Brothers, Milford, Texas.  
Bovina Mercantile Company, Bovina, Texas.  
Bower, Louis, Graham, Texas.  
Bowers & Vinson, Tahoka, Texas.  
Bowersock Mills & Power Company, Lawrence, Kansas.  
Bowie Cotton Oil & Gin Company, Bowie, Texas.  
Bowie County Cotton Oil Company, New Boston, Texas.  
Boyce, M. C., Utopia, Texas.  
Boyd-Gunning Milling Company, Webb City, Missouri.  
Boyd & Brigmore, Sarcxie, Missouri.  
Bradbury, R., Beaumont, Texas.  
Bradfish, H. J., Weatherford, Texas.  
Bradshaw, R. E., Grain Company, Houston Heights, Texas.  
Brady, P. L., Jr., Hearne, Texas.  
Brady Oil Company, Brady, Texas.  
Bramblett, T. L., Alvarado, Texas.  
Brand-Dunwoody Milling Company, Joplin, Missouri.  
Brashear, L. C., Sunset, Texas.

Brazoria Grain Company, Brazoria, Texas.  
Brazos Valley Cotton Oil Company, Waco, Texas.  
Breckenridge Milling & Gin Company, Breckenridge, Texas.  
Brenham Compress, Oil & Manufacturing Company, Brenham, Texas.  
Brennand, W. H., Semincle, Texas.  
Brent Brothers, Dodd City, Texas.  
Brewer, E. A., Denton, Texas.  
Brice-Burnett & Company, Snyder, Texas.  
Bridges, H. S., Roby, Texas.  
Brigance & Teavis, Navasota, Texas.  
Brock, J. W., Grapevine, Texas.  
Brode, F. W., & Co., Dallas Texas.  
Brooks Grain Company, Wellington, Texas.  
Brooks & Woodruff, Southmayd, Texas.  
Brown, Harry, Whitewright, Texas.  
Brown, F. A., Elstone, Texas.  
Brown, J. M., Beeville, Texas.  
Brown, J. B., Channing, Texas.  
Brown & Dishman, Bellevue, Texas.  
Brown Grain Company, McKinney, Texas.  
Brownwood Oil Mill, Brownwood, Texas.  
Bryan Cotton Oil & Fertilizer Company, Bryan, Texas.  
Bryant, J. E., Saint Jo, Texas.  
Buchel Milling Company, Cuero, Texas.  
Buckeye Cotton Oil Company, Cincinnati, Ohio.  
Buckeye Cotton Oil Company, Selma, Alabama.  
Buckeye Cotton Oil Company, Memphis, Tennessee.  
Buda Milling Company, Buda, Texas.  
Buden-Vilm Milling Company, Winfield, Kansas.  
Buhler Mill & Elevator Company, Buhler, Kansas.  
Bulte Mills, Kansas City, Missouri.  
Bumguardner, W. T., Brady, Texas.  
Bunch, T. H., Commission Company, Little Rock, Arkansas.  
Bunts, A. J., Munday, Texas.  
Burke Grain Company, St. Joseph, Missouri.  
Burleson Mill & Elevator Company, Burleson, Texas.  
Burnett, W. F., Little Robe, Oklahoma.  
Burnet Roller Mills, Burnet, Texas.  
Burns, W. B., Big Springs, Texas.  
Burrus Mill & Elevator Company, Fort Worth, Texas.  
Burson, J. R., Silvertown, Texas.  
Burson & King, Georgetown, Texas.  
Burton Cotton Oil Company, Burton, Texas.  
Bussey, C. H., Hutchins, Texas.  
Butler County Feed & Milling Company, Greenville, Alabama.  
Byers Cotton Oil Company, Byers, Texas.

Caddo Cotton Oil Company, Shreveport, Louisiana.  
Caddo Milling Company, Caddo, Oklahoma.  
Cage, D. S., & Company, Houston, Texas.  
Cairo Milling Company, Cairo, Illinois.  
Cain, E. H., Bartlett, Texas.  
Caldwell, F. L., Mertzon, Texas.  
Caldwell Milling Company, Caldwell, Kansas.  
Caldwell Oil Mill Company, Caldwell, Texas.  
Cameron Cotton Oil Company, Cameron, Texas.  
Cameron Grain Company, Cameron, Texas.  
Campbell, H. L., Paris, Texas.  
Camp Spring Mill Company, Nashville, Illinois.  
Canadian Implement Company, Canadian, Texas.  
Canadian Mill & Elevator Company, El Reno, Oklahoma.

Canton Milling Company, Canton, Kansas.  
Canutillo Roller Mill Company, Canutillo, Texas.  
Cape County Milling Company, Jackson, Missouri.  
Capital City Mills, Austin, Texas.  
Capital Grain & Elevator Company, Oklahoma City, Oklahoma.  
Carlisle Commission Company, Kansas City, Missouri.  
Carmichael, W. D., Nocona, Texas.  
Carmine Cotton Oil & Manufacturing Company, Carmine, Texas.  
Carmoda, Nicola, Hearne, Texas.  
Carney Milling Company, Carney, Texas.  
Carothers, A. B., Rochester, Texas.  
Carpenter, H. C., Marlin, Texas.  
Carpenter & Gressett, Ferris, Texas.  
Carrollton Mill & Electric Company, Carrollton, Texas.  
Carson, A. M., Willis, Texas.  
Carter, J. M., San Saba, Texas.  
Carter Grain Company, Bay City, Texas.  
Carthage Cotton Oil Company, Carthage, Texas.  
Cason, L. C., Cleburne, Texas.  
Caudle, M. C., Dorchester, Texas.  
Cawyer, John B., Mercantile Company, Mercury, Texas.  
C. C. Milling Company, Waxahachie, Texas.  
Cedar Hill Milling Company, Cedar Hill, Texas.  
Celina Corn Mill, Celina, Texas.  
Celina Mill & Elevator Company, Celina, Texas.  
Center Cotton Oil Company, Center, Texas.  
Center Point Roller Mill, Center Point, Texas.  
Chalfant Grain Company, Clinton, Oklahoma.  
Chamberlain, F. B., Company, St. Louis, Missouri.  
Chance, C. E., Shamrock, Texas.  
Chandler & Norris, Graham, Texas.  
Chandler, J. M., Sutherland Springs, Texas.  
Channing Mercantile & Banking Company, Channing, Texas.  
Chapin & Company, Hammond, Indiana.  
Chapman Milling Company, Sherman, Texas.  
Charleston Milling Company, Charleston, Missouri.  
Checotah Mill & Elevator Company, Checotah, Oklahoma.  
Chenoweth, E. B., Grain Company, Dallas, Texas.  
Cherokee Mill & Elevator Company, Cherokee, Kansas.  
Chickasha Cotton Oil Company, Chickasha, Oklahoma.  
Chickasha Milling Company, Chickasha, Oklahoma.  
Childress Grain Company, Temple, Texas.  
Chillicothe Cotton Oil Company, Chillicothe, Texas.  
Chinski, A. A., Houston, Texas.  
Christine Gin & Milling Company, Christine, Texas.  
Churchill, W., Woodsboro, Texas.  
Cia Industrial Jabonera de la Laguna, S. A., Gomez Palacio Dgo, Mexico.  
Cisco Oil Mill, Cisco, Texas.  
Citizens Cotton Oil Company, Cumby, Texas.  
Citizens Cotton Oil Company, Taylor, Texas.  
Citizens Mill & Brokerage Company, Seguin, Texas.  
Citizens Cotton Oil Company, Lancaster, Texas.  
Citizens Industrial Mill & Elevator Company, Weatherford, Oklahoma.  
City Feed Store, Kingsville, Texas.  
City Grain & Feed Company, Kingsville, Texas.  
City Mill, Ennis, Texas.  
City Mill & Elevator Company, Emporia, Kansas.  
City Mill & Light Company, Royse City, Texas.  
Clafin Mill & Elevator Company, Clafin, Kansas.  
Clarendon Grain Company, Clarendon, Texas.  
Clark, John H., Clarendon, Texas.

Clark-Lynn Grain Company, Texarkana, Tex.-Ark.  
Clarkson Milling Company, Winfield, Kansas.  
Clarksville Cotton Oil Company, Clarksville, Texas.  
Clay County Cotton Oil Company, Henrietta, Texas.  
Clebume Grain & Seed Company, Cleburne, Texas.  
Clebume Oil Mill Company, Cleburne, Texas.  
Clebume Peanut & Product Company, Cleburne, Texas.  
Clemens Grain Company, Waco, Texas.  
Clement, G. W., & Sons, Lampasas, Texas.  
Clever Milling Company, Clever, Missouri.  
Clifton Mill & Elevator Company, Clifton, Texas.  
Clinton Alfalfa Mill, Clinton, Oklahoma.  
Clinton Sugar Refining Company, Clinton, Iowa.  
Clopton, A. M., Elgin, Texas.  
Clover Leaf Milling Company, Wellington, Missouri.  
Cobb, L. G., Citrus Grove, Texas.  
Cobb Grain Company, Plainview, Texas.  
Cochran, H. K., Little Rock, Arkansas.  
Coffield Milling Company, Bowie, Texas.  
Cokes, H. P., Crisp, Texas.  
Cole, H. C., Milling Company, Chester, Illinois.  
Cole, H. W., Oklahoma City, Oklahoma.  
Coleman Grain & Mercantile Company, Coleman, Texas.  
Collin County Mill & Elevator Company, McKinney, Texas.  
Collin & Morton, Weir, Texas.  
Comanche Cotton Oil Company, Comanche, Texas.  
Comanche Grain & Elevator Company, Comanche, Oklahoma.  
Comanche Milling Company, Comanche, Texas.  
Combs, H., Meridian, Texas.  
Comfort Roller Mills, Comfort, Texas.  
Commerce Oil Mill, Commerce, Texas.  
Commonwealth Feed Mill Company, St. Louis, Missouri.  
Community Milling Company, El Paso, Texas.  
Conklin, W. T., Grain Company, Kaw City, Oklahoma.  
Conkey, G. E., Company, Cleveland, Ohio.  
Consolidated Flour Mills Company, Hutchinson, Kansas.  
Continental Oil & Cotton Company, Abilene, Texas.  
Continental Oil & Cotton Company, Colorado, Texas.  
Cooper Cotton Oil Company, Cooper, Texas.  
Cooper, J. W., Wortham, Texas.  
Corn Belt Grain Company, Atchison, Kansas.  
Cornforth Grain Company, Waco, Texas.  
Corno Mills, East St. Louis, Illinois.  
Corn Products Refining Company, New York City, New York.  
Corpus Christi Cotton Oil Company, Corpus Christi, Texas.  
Corsicana Roller Mills, Corsicana, Texas.  
Cottonseed Oil Company of Texas, Dallas, Texas.  
Cottonseed Cake & Meal Company of Texas, Dallas, Texas.

Zedler, H. & C., Luling, Texas.  
Zeiss Brothers, Brenham, Texas.

## AVERAGE COMPOSITION OF FEEDING STUFFS ON BASIS OF INSPECTION

Table 6 shows the average of the analyses which appear in this bulletin for many of the commercial feeding stuffs. The composition of mixed feeds is not included in this table.

Table 6.—Average Contents of Protein, Fat, Fiber, Nitrogen-Free Extract, Water and Ash in Feed Control Samples, 1917-1918.

No.	Name of Feedstuff	Crude protein	Crude fat	Crude fiber	Nitrogen-free extract	Water	Ash
		<i>Per ct.</i>	<i>Per ct.</i>	<i>Per ct.</i>	<i>Per ct.</i>	<i>Per ct.</i>	<i>Per ct.</i>
7	Alfalfa Meal.....	14.37	1.79	30.21	38.24	8.75	6.64

40	Prime Cottonseed Meal*.....	43.55	7.86	10.23	26.29	6.73	5.34
52	Rice Bran.....	10.58	13.40	14.82	42.54	8.30	10.36
14	Rice Polish.....	12.29	12.67	4.03	55.93	8.84	6.24
2	Rye Middlings.....	16.64	3.83	6.89	60.26	7.77	4.61
29	Wheat Bran.....	17.01	4.07	8.86	55.58	9.06	5.42
51	Wheat Bran and Screenings.....	16.33	4.02	9.91	53.81	9.93	6.00
16	Wheat Brown Shorts.....	18.49	4.52	6.33	56.90	9.62	4.18
9	Wheat Brown Shorts and Screenings.....	16.97	4.28	7.00	57.04	9.90	4.81
53	Wheat Gray Shorts.....	17.76	4.25	5.95	59.22	8.89	3.93
6	Wheat Gray Shorts and Screenings.....	17.80	4.31	6.11	57.09	10.25	4.44
4	Wheat Middlings and Screenings.....	15.89	4.01	7.45	57.43	10.17	5.05
9	Wheat Mixed Feed.....	16.86	3.94	7.83	56.93	9.51	4.93
26	Wheat Mixed Feed and Screenings.....	17.19	4.05	9.02	54.54	9.75	5.45
6	Wheat White Shorts.....	18.98	2.98	2.90	62.34	9.91	2.89
15	Whole Pressed Peanuts.....	35.09	8.34	20.82	22.78	7.83	5.14

\*Note.—The average analyses of cottonseed meal and cottonseed cake shown in the table includes all samples, many of which were of very low quality. The manufacturers of these low grade products were required to register, tag and sell the same as one of the grades of cottonseed feed, as the case may have been. Prosecution often followed.

## MILITARY SERVICE ROLL

Two members of the staff of the Division of Feed Control Service have enlisted in the military service of the United States, as follows:

July 16, 1918, W. M. Wickes, Sergeant, Troop E, 7th Cavalry, Texas National Guard.

July 23, 1918, James Sullivan, Lieutenant, 8th Texas Infantry Supply Company.

## THEODORE H. WOLTERS—AN APPRECIATION

---

On the twenty-ninth of July, 1917, at his home in Schulenburg, Texas, passed to his reward Theodore H. Wolters. Were it for no other reason than that he was closely identified with the work of the Division of Feed Control Service, it would be appropriate for us to pay tribute to his memory. There are other reasons, however, why it is befitting that we should express our appreciation of the life and labors of this man.

Theodore H. Wolters, son of Jacob F. and Margaret Wolters, was born in Industry, Texas, April 15, 1846. His father was greatly devoted to the land of his adoption, and it would have been most gratifying to the intensely loyal and patriotic nature of Theodore H. Wolters, had he lived to know that the fourth generation of his family in Texas was "carrying on" the work his father established in the early days of Texas struggles.

Mr. Wolters became connected with the Division of Feed Control Service as Feed Inspector, September 27, 1911, in which capacity he served until his final illness. In the performance of all his official duties he was loyal, faithful and conscientious. He was frank and straightforward, loyal to his friends, honest in all his dealings, earnest, industrious and capable. He was a man of most excellent character and was loved by a large circle of friends who received the announcement of his death with genuine sorrow.

## ACKNOWLEDGMENTS

The analytical work involved in this bulletin was performed under the direction of Dr. G. S. Fraps, Chemist, Experiment Station, and State Chemist, to whom is also due our acknowledgment for expert advice received from time to time.

The Chief of the Division of Feed Control Service wishes to acknowledge the receipt of and extend thanks to Director B. Youngblood, James Sullivan, Executive Secretary, and each member of the Division Staff for assistance and co-operation in carrying on the past year's work. Whatever success has been attained can be attributed, largely, to their faithful and painstaking effort.

## RESULTS OF ANALYSES

The following pages contain a detailed report of analyses completed during the season 1917-18. Please note that this list is arranged alphabetically by towns, showing the names of all manufacturers registered in each city or town.
